Essential Readings in Problem-Based Learning Andrew Walker, Heather Leary, Cindy Hmelo-Silver, 2015-01-15 Like most good educational interventions problem based learning PBL did not grow out of theory but out of a practical problem Medical students were bored dropping out and unable to apply what they had learned in lectures to their practical experiences a couple of years later Neurologist Howard S Barrows reversed the sequence presenting students with patient problems to solve in small groups and requiring them to seek relevant knowledge in an effort to solve those problems Out of his work PBL was born The application of PBL approaches has now spread far beyond medical education Today PBL is used at levels from elementary school to adult education in disciplines ranging across the humanities and sciences and in both academic and corporate settings This book aims to take stock of developments in the field and to bridge the gap between practice and the theoretical tradition originated by Barrows that underlies PBL techniques

In the Nation's Compelling Interest Institute of Medicine, Board on Health Sciences Policy, Committee on Institutional and Policy-Level Strategies for Increasing the Diversity of the U.S. Health Care Workforce, 2004-06-29 The United States is rapidly transforming into one of the most racially and ethnically diverse nations in the world Groups commonly referred to as minorities including Asian Americans Pacific Islanders African Americans Hispanics American Indians and Alaska Natives are the fastest growing segments of the population and emerging as the nation's majority Despite the rapid growth of racial and ethnic minority groups their representation among the nation's health professionals has grown only modestly in the past 25 years This alarming disparity has prompted the recent creation of initiatives to increase diversity in health professions In the Nation's Compelling Interest considers the benefits of greater racial and ethnic diversity and identifies institutional and policy level mechanisms to garner broad support among health professions leaders community members and other key stakeholders to implement these strategies Assessing the potential benefits of greater racial and ethnic diversity among health professionals will improve the access to and quality of healthcare for all Americans
