Teaching College Students To Read Analytically:

Teaching College Students to Read Analytically Jan Cooper, Rick Evans, Elizabeth Robertson, 1985 Based on the experiences of writing lab instructors working with college students whose writing was affected by poor comprehension of difficult texts this book explores the use of writing about reading to help students become more aware or analytical of their reading processes The first chapter provides a theoretical context for teaching analytical reading in the context of writing The second chapter recounts a teacher's work with a basic writing student whose inexperience with reading interfered with his writing and describes the individualized reading course that balanced familiar and unfamiliar reading materials The third chapter describes adapting a similar approach in a class of 22 freshman English students focusing on a single book and how the teacher's responses to student journal entries concerning their reactions to the book helped the students develop both critical reading and critical writing abilities The fourth chapter discusses how the same approach was adapted to a sophomore literature class and how the students writing about reading allowed the instructor to take part in their attempts to understand the assigned texts at every stage of their reading The book concludes with a 16 item annotated bibliography of works exploring the psychological and pedagogical theory behind this approach HTH

of a Coherent Literature Curriculum Sandra Stotsky, 2012-06-16 This book is addressed to teachers who know that the secondary literature curriculum in our public schools is in shambles Unless experienced and well read English teachers can develop coherent and increasingly demanding literature curricula in their schools average high school students will remain at about the fifth or sixth grade reading level where they now are to judge from several independent sources This book seeks to challenge education policy makers test developers and educators who discourage the assignment of appropriately difficult works to high school students and make construction of a coherent literature curriculum impossible It first traces the history

of the literature curriculum in our middle schools and high schools and shows how it has been diminished and distorted in the past half century It then offers examples of coherent literature curricula and spells out the cognitive principles upon which coherence is based Finally it suggests what English teachers in our public schools could do to develop a literature curriculum that gives all their students an adequate basis for participation in an English speaking civic culture

Unforgettable W. Michael Gray,2016-10-12 We have an uneasy relationship with the relentless deluge of information gushing out of academia and our media outlets To turn it off is escapist but to attempt to cognitively grapple with it is overwhelming In *Unforgettable* Enabling Deep and Durable Learning a nationally recognized master teacher gives professors and their students the means to chart a clear path through this information explosion Humans crave explanatory patterns and this book enables teachers to think deeply about their academic disciplines to find and articulate their core explanatory principles and to engage their students in a compelling way of thinking An alternative title for this book could be *Why the Best College Teachers Do What They Do* because the author articulates a compelling rationale that will equip faculty to create and deliver transformative courses Students in transformative courses grapple with essential questions and gain mental muscle that equips them for real world challenges
