Teaching In The Desegregated Classroom:

Teaching in the Desegregated Classroom Ruth Sloan Taylor,1974 **School Desegregation** Y. Amir,S. Sharan,R. Ben-Ari,2013-02-01 Published in the year 1984 School Desegregation is a valuable contribution to the field of Education

Effective Teaching in the Desegregated School James H. Bash,1966 **Human Resources in School Desegregation** Mark A. Chesler,Judith T. Guskin,Phyllis Erenberg,1969 Planning Educational Change: Human resources in school desegregation United States. Office of Education,1969 **Classrooms and Corridors** Mary Haywood Metz,2023-11-15 Classrooms and Corridors The Crisis of Authority in Desegregated Secondary Schools delves into the complex dynamics of education and social order within two urban junior high schools navigating the challenges of desegregation Based on extensive fieldwork this book provides a vivid in depth portrayal of daily life in these schools highlighting the struggle to balance academic objectives with the need for safety and civility Through detailed observations interviews and an analysis of over 4 000 pages of notes and transcripts the author offers a nuanced examination of how educators and students interact in a charged environment shaped by shifting racial social and cultural contexts The study s rich narrative captures how these unique circumstances reveal broader processes that influence schools across the nation making it a vital resource for understanding the intersection of education authority and community in transitional settings Written with both scholarly rigor and accessibility for educators parents and policymakers Classrooms and Corridors transcends theoretical analysis to provide practical insights The book situates its findings within the broader framework of organizational theory and authority offering a lens through which to interpret the challenges of maintaining order and fostering cooperation in diverse educational environments By documenting the experiences of teachers administrators and students during a transformative period in American history it illuminates the often invisible forces that shape learning and behavior This compelling study is not only a chronicle of two extraordinary schools but also a guide to understanding the universal challenges faced by secondary schools striving to integrate academic success with an equitable and harmonious community This title is part of UC Press s Voices Revived program which commemorates University of California Press s mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1978 **School Desegregation** Walter Stephan,2013-06-29 An Exploratory Study of Change in Teachers' Attitudes Toward Intergroup Relations in the Classroom During the First Year of Desegregation in the Kansas City, Missouri, Public Schools Constance Burkhardt Nelson,John J. Hanitchak,1957 As an increasing number of social scientists have pointed out the process of desegregation in the public schools presents a rare opportunity for basic social science research Whereas it has been illegal in seventeen border and southern states for white and negro children to attend the same schools now in many communities it is legal for them to do so In March 1955 the Kansas City Missouri Board of

Education implemented the 1954 Supreme Court decision by announcing that all of its schools would be desegregated as of September 1 1955 Here was a clear cut change in administrative policy which would bring about changes in local schools and in individual classrooms One might say that a desegregated classroom would be a ready made social laboratory where one might study what happens when people of different races meet and begin to work together This study focused on the teacher who was assumed to be one of the key persons in such a transitional period Since he was in close touch not only with students but also with other teachers parents and many persons in the larger community it seemed evident that his attitudes would be important in determining how desegregation of schools might work out This was an exploratory experimental study testing in the fall and in the spring with both quantitative and qualitative instruments teachers attitudes toward intergroup relations in their classrooms during the first year of desegregation in the Kansas City Missouri public schools 1955 56 The subjects were 114 teachers of both white and negro races who taught in the first and sixth grades The control group was composed of those teaching in segregated classrooms the experimental group those teaching in desegregated classrooms This study seeks to explore two questions 1 Will there be change in teachers attitudes toward intergroup relations in their classrooms during this first year of desegregation 2 What are some of the socio psychological correlates of this change or lack of change in attitudes The major hypothesis of this study was that there would be a significant difference in desegregated and segregated teachers change in attitudes toward intergroup relations in their classrooms This hypothesis tested with the Intergroup Relations Test was confirmed The nature of this difference was that more of the desegregated teachers became inconsistent in their attitudes during the year and their actual change scores were higher than were those of the segregated teachers It was not concluded that desegregation operated automatically out there to effect change within the teacher Rather it was suggested that the induced force of desegregation had interacted with the teachers own forces i e values concept of the teacher s role etc and immediate classroom situational factors here the three intergroup problem areas built into the test to bring about such change It seemed feasible that a break up in former attitudes had begun and that clarification and in service training during such a transitional period might help toward more favorable attitude change It was postulated that many conditions reported in the literature to facilitate favorable attitude change were probably not present during this first year of desegregation The four secondary hypotheses concerned the relationship between attitude change and selected socio psychological variables grade taught race of teacher authoritarianism Fall F score and age years taught and mobility of the teacher With few exceptions these variables were shown to be not significantly related to attitude change in this study Utilizing qualitative data from interviews which were held with a representative sample of the teachers several hypotheses were suggested for further research It was postulated that such interpersonal variables as equal status contacts made possible by integrating faculties strong local administrative support and favorable group norms at the local level may be important concomitants of attitude change as compared with the relatively static socio psychological variables

studied here **School Desegregation Research** Jeffrey Prager, Douglas Longshore, Melvin Seeman, 1986-04-30 The desegregation situation is the keynote theme of the following chapters I Each of them touches on a different dimension of the situation the historical the temporal the spatial But the reader perusing the essays with the situation in mind should remember that the desegregation situation should not be interpreted literally Authorities and adults certainly school age children probably are influenced by their awareness of a sequence of past and future situations Some may even operate with William James's 1890 p 608 notion of the specious present that has melted in our grasp fled ere we could touch it gone in the instant of becoming thus reducing the potency of the present situation Others may be dancing to a slower tempo of change thus becoming more responsive to the present situation Whatever the perceived tempo many must share the view that the future may reverse the direction of the past Some may see that new future direction as unswerving unending or long lasting others may see it as short lived And it is through attention to the phenomenological description of desegregation that these issues can be explored a theme that is considered in several of the following chapters Resources in Education ,1995
