University Play and Imagination in Children with Autism has been the cornerstone of my professional and personal life for nearly a decade. This updated edition retains the original accessible style explaining so clearly the pivotal role that peer play holds in the lives of individuals on the autism spectrum while providing readers with cutting edge developments in theory, research, and practice in the field. Heather McCracken, Founder, Executive Director, Friend 2 Friend Social Learning Society. Dr. Wolfberg continues to break new ground with the second edition of her book. What a pleasure for any child to get involved in one of her integrated play groups and what a relief for parents to know that their child is both learning and having fun. This is a wonderful resource for professionals interested in creating engaging and effective social skills groups for children on the autism spectrum. Connie Kasari, UCLA Graduate School of Education and Information Studies. Children with autism benefit in so many ways from social play experiences despite the significant challenges in symbolic development. Dr. Pamela Wolfberg, a leading expert in this crucial aspect of children's development, once again guides us in a highly engaging manner in supporting social and play development for children with ASD. Barry M. Prizant, Director, Childhood Communication Services, Brown University. This book is a must for anyone who wants to bring about genuine social reciprocity and imagination in children with autistic spectrum disorders. Pamela Wolfberg takes us on a journey through previously uncharted territory, documenting in rich qualitative detail how to scaffold entry into the culture of peer play. Adriana L. Schuler, San Francisco State University. Dr. Wolfberg has done a fine and sensitive job in characterizing the pivotal role that play skills hold in the social and linguistic world of the child with autism. Her development of Integrated Peer Play Groups and the delineation of the autistic child as the Novice Player and the typical child as the Expert Player is a very valuable heuristic tool to all who work with children with autism. Bryna Siegel, Langley Porter Psychiatric Institute, University of California, San Francisco.
