Regarding Educación Bryant Jensen, Adam Sawyer, 2013-01-28 *The Latino Education Crisis* not only threatens to dash the middle class aspirations of the nation's largest immigrant group, it is also an ominous sign for democratic engagement and global competitiveness for U.S. society as a whole This timely book argues that this crisis is more aptly characterized as a Mexican Education Crisis This book brings together voices that are rarely heard on the same stage: Mexican and U.S. scholars of migration, schooling and human development to articulate a new approach to Mexican American schooling: a bi-national focus that highlights the interpersonal assets of Mexican origin children Contributors document the urgency of adopting this approach and provide a framework for crossing national and disciplinary borders to improve scholarship policy and practice associated with PreK-12 schooling

The Courage to Learn Marcia Eames-Sheavly, Paul Michalec, Catherine M. Wehlburg, 2023-07-03 It takes courage to engage in the kind of deep transformational learning that so many people need in their lives and this book is designed to help find and nurture that

courage in learners including those that are engaged in facilitating the courageous learning of others Inspired by Parker Palmer s classic book *The Courage to Teach* the authors have carefully examined the learning side of the teaching and learning relationship and this book shares the resulting wealth of knowledge and experience with readers This book is informed by Palmer s observation that the conversations in teaching can be organized around four questions what how why and who In this book the authors center learning instead of teaching as they ask What is the content of learning How do we learn Why is it necessary what motivates us And who is the self that learns The authors have engaged in conversation with adult learners across the lifespan representing different ages social economic levels and approaches to learning Drawing on these discussions their own experiences and the scholarly literature they weave a tapestry with threads of learning and teaching story and analysis that serve as warp and weft The authors pay tribute to the learner s journey in the fullness of the process and name the distinct forms of courage that learning takes In the concluding chapter the authors explore the implications for educational practice and offer guidance for any educator wishing to bring a *Courage to Learn* conversation to their community

Interpersonal Regulation of Learning and Motivation Simone Volet, Marja Vauras, 2013 *Interpersonal Regulation of Learning and Motivation* is the first book in the field to focus on major methodological advances in research on interpersonal regulation of learning and motivation Interest in developing ways of capturing the dynamics of interpersonal regulation in real life learning interactions is growing rapidly Understanding these dynamics is particularly timely given the increased use of collaborative learning activities in schools and university settings as well as through face to face and computer supported collaborative learning CSCL environments While groups and collections of individuals in social interaction are expected to bring their own motivations and goals to the learning situations it is also assumed that these are further shaped through interaction as the group activity evolves Research methodology publications in the field of learning regulation and motivation are still dominated by a focus on the individual The study of collaborative learning at both conceptual and methodological level has not incorporated the significance of social regulatory processes of learning and motivation This is a new development in the field and one covered by this book The book contains numerous illustrations of innovative Methodological approaches to study and interpret the dynamics of interpersonal regulation Data sources and data representations to capture scaffolded instruction Theory based analytic methods to investigate interactions in real life collaborative learning Coding systems and social software tools for gathering and analysing interactive data *Interpersonal Regulation of Learning and Motivation* brings together the work of scholars who have been studying interpersonal regulation of learning and motivation at the boundaries of the individual and the social and who have made original methodological contributions to the study of interactive learning environments In combination their work provides a range of distinctive and original conceptual and methodological contributions to this under examined and vital field of research making this an essential read for any researcher or student interested in collaborative learning and motivation
