Fostering Children's Mathematical Power Arthur Baroody, Arthur J. Baroody, Jesse L.M. Wilkins, Ronald T.

Coslick, 1998-09-01 Teachers have the responsibility of helping all of their students construct the disposition and knowledge needed to live successfully in a complex and rapidly changing world To meet the challenges of the 21st century students will especially need mathematical power a positive disposition toward mathematics curiosity and self confidence facility with the processes of mathematical inquiry problem solving reasoning and communicating and well connected mathematical knowledge an understanding of mathematical concepts procedures and formulas This guide seeks to help teachers achieve the capability to foster children's mathematical power the ability to excite them about mathematics help them see that it makes sense and enable them to harness its might for solving everyday and extraordinary problems The investigative approach attempts to foster mathematical power by making mathematics instruction process based understandable or relevant to the everyday life of students Past efforts to reform mathematics instruction have focused on only one or two of these aims whereas the investigative approach accomplishes all three By teaching content in a purposeful context an inquiry based fashion and a meaningful manner this approach promotes children's mathematical learning in an interesting thought provoking and comprehensible way This teaching guide is designed to help teachers appreciate the need for the investigative approach and to provide practical advice on how to make this approach happen in the classroom It not only dispenses information but also serves as a catalyst for exploring conjecturing about discussing and contemplating the teaching and learning of mathematics

Math through Children's Literature Kathryn Braddon, Nancy Hall, Dale Taylor, 1993-02-15 Use children's literature as a springboard to successful mathematical literacy This book contains summaries of books each related to the NCTM Standards that will help children gain familiarity with and an understanding of mathematical concepts Each chapter has classroom tested activities and a bibliography of additional books to further expand student learning

Teaching Mathematics Through Story Caroline McGrath, 2014-06-27 This book explores the exciting ways in which story can be used as a flexible resource to facilitate children's mathematical thinking It looks at the potential relationship between story and mathematics and practically demonstrates how they can be combined to help children connect understand and express mathematical ideas using story language This book draws on practical work with children educators parents professional storytellers and trainee practitioners who bring theoretical ideas to life and offer insight into their mathematical story experiences It is a must have for all those who want to make mathematics relevant accessible and imaginative for young children *Teaching Math Through Storytelling* Gigi Carunungan, Making math accessible to young learners is

especially challenging This hands on book provides a method for teaching math with fun stories that allow students to experience math concepts in real world contexts Teachers can choose from a selection of suggested stories or they can create their own to reflect the interests and identities of their students This lively resource includes math learning activities and creative simulations that make math concepts come alive guidance for incorporating intercultural scenarios and stories to foster inclusivity teaching strategies and lesson designs grounded in research a focus on transforming traditional math teaching into an approach that enhances critical thinking and problem solving skills and detailed lesson plans for integrating innovative approaches into existing curricula Teachers K 5 can use this book to move away from memorizing and rote activities into dynamic learning experiences that make math learning fun Book Features Uses engaging interactive storytelling to help young learners develop a deeper understanding of mathematical principles Incorporates intercultural scenarios and stories so students see themselves in the lessons fostering a more inclusive and relatable learning environment Provides teaching strategies and lesson designs drawn from academic sources and field studies to provide educators with reliable and effective methods Provides detailed lesson plans that demonstrate innovative and effective ways for children to overcome math anxiety and integrate math into everyday thinking

Connecting Emergent Curriculum and Standards in the Early Childhood Classroom Sydney Schwartz, Sherry Copeland, 2015-04-24

The most pressing challenge in early childhood education today is to find a way to meet the standards within a developmentally appropriate approach. In this book two active early childhood educators provide teachers with resources to bring content alive and document it in every day action based pre K and Kindergarten classrooms. The book includes lists of key content ideas coordinated with learning standards in science, mathematics, social studies and the communication arts to guide teacher observations of and interactions with young children. Chapters focus on ways to extend children's emerging use of content in the block, manipulative, sand and water, drama, expressive arts and literacy centers as well as link to the development of themes. Book features include:

- Lists of key ideas in the content areas
- Examples of conversations that nurture children's emerging content understandings
- Vignettes from the field illustrating teachers' experiences of embedding content into center activities along with photographs
- Sample forms for documenting children's learning as they meet the standards in a variety of contexts

Sydney L. Schwartz is a Professor Emerita of Queens College of the City University of New York. Sherry M. Copeland is an experienced early childhood teacher, teacher trainer, advocate and director of early childhood programs.
