The Art of Teaching Science Jack Hassard, Michael Dias, 2013-07-04

The Art of Teaching Science emphasizes a humanistic experiential and constructivist approach to teaching and learning and integrates a wide variety of pedagogical tools Becoming a science teacher is a creative process and this innovative textbook encourages students to construct ideas about science teaching through their interactions with peers mentors and instructors and through hands on minds on activities designed to foster a collaborative thoughtful learning environment This second edition retains key features such as inquiry based activities and case studies throughout while simultaneously adding new material on the impact of standardized testing on inquiry based science and explicit links to science teaching standards Also included are expanded resources like a comprehensive website a streamlined format and updated content making the experiential tools in the book even more useful for both pre and in service science teachers

Special Features

Each chapter is organized into two sections one that focuses on content and theme and one that contains a variety of strategies for extending chapter concepts outside the classroom Case studies open each chapter to highlight real world scenarios and to connect theory to teaching practice Contains 33 Inquiry Activities that provide opportunities to explore the dimensions of science teaching and increase professional expertise Problems and Extensions On the Web Resources and Readings guide students to further critical investigation of important concepts and topics An extensive companion website includes even more student and instructor resources such as interviews with practicing science teachers articles from the literature chapter PowerPoint slides syllabus helpers additional case studies activities and more Visit <http://www.routledge.com/textbooks/9780415965286> to access this additional material

The Art of Teaching Science Vaille Dawson, Jennifer Donovan, 2020-07-16

The Art of Teaching Science has proven itself to be one of the most popular introductory texts for Australian pre service and in service teachers providing guidance on engaging students and helping develop scientifically literate citizens Beginning with an examination of the nature of science constructivist and socio cultural views of teaching and learning and contemporary science curricula in Australian schools the expert authors go on to explore effective teaching and learning strategies approaches to assessment and provide advice on the use of ICT in the classroom Fully revised and updated this edition also reflects the introduction of the AITSL professional standards for teachers and integrates them throughout the text New chapters explore a range of teaching strategies including explicit instruction active learning and problem based learning the effective integration of STEM in schools approaches to differentiation in science education and contemporary uses of ICT to improve student learning Those new to this text will find it is deliberately written

in user friendly language Each chapter stands alone but collectively they form a coherent picture of the art in the sense of creative craft and science as in possessing the knowledge understanding and skills required to effectively teach secondary school science Helping each new generation of school science teachers as they begin their careers is crucial to education This is the updated third edition of this valuable textbook It contains a wonderful range of inspirational chapters All science teachers not only those at the start of the profession would benefit from it in Australia and beyond Michael J Reiss Professor of Science Education University College London
