Trauma Doesn't Stop at the School Door Karen Gross, 2020 This book explores how educational institutions have failed to recognize and effectively address the symptoms of trauma in students of all ages Given the prevalence of traumatic events in our world including the COVID 19 pandemic Gross argues that it is time for educational institutions and those who work within them to change their approaches and responses to traumatic symptoms that manifest in students in schools and colleges These changes can alter how and what we teach how we train teachers how we structure our calendars and create our schedules how we address student behavior and disciplinary issues and how we design our physical space Drawing on real life examples and scenarios that will be familiar to educators this resource provides concrete suggestions to assist institutions in becoming trauma responsive environments including replicable macro and microchanges Book Features Focuses on trauma within the early childhood adult educational pipeline Explains how trauma is often cumulative with recent traumatic events often triggering a revival of traumatic symptomatology from decades ago Provides clarifications of currently used terms and scoring systems and offers new and alternative approaches to identifying and ameliorating trauma Includes visual images to augment the descriptions in the text

The Thematic Evolution of Sports Journalism's Narrative of Mental Illness Ronald Bishop, 2023-03-24 In *The Thematic Evolution of Sports Journalism's Narrative of Mental Illness* A Little Less Conversation Ronald Bishop contends that the conversation developed and sustained by sports journalists about professional athletes' experience with mental illness has evolved through three slightly overlapping stages each marked by a primary theme During the first stage from the end of the 19th Century to the middle of the 20th century sports journalists sensationalized the experience and portrayed the athletes breathlessly labeled insane as tragic figures During the roughly two decade second stage an athlete's experience with mental illness was portrayed as an inconvenience that flummoxed and infuriated team officials who had neither the ability nor the inclination to

address the issue The final stage leading up to present day and beyond is most notable for the development and widespread adoption of a coverage template that centers around an athlete's brave decision to reveal and discuss their experiences Combining historical research and narrative analysis Bishop interrogates whether sports journalists have finally begun to cover the experience of mental illness with sufficient depth Scholars of media studies journalism celebrity studies and sports psychology will find this book of particular interest *50 Activities for Self-directed Teams* Glenn M.
