Paskevskaja,2016 In Getting Started in Ballet A Parent s Guide to Dance Education authors Anna Paskevskaja and Maureen

Janson comprehensively present the realities that parents can anticipate during their child's training and or career in ballet. It can be daunting and confusing when parents discover their child's desire to dance. Parental guidance and education about dance study typically comes from trial by fire. This book expertly guides the parental decision making process by weaving practical advice together with useful information about dance history and the author's own memoir. From selecting a teacher in the early stages to supporting a child through his or her choice to dance professionally, parents of prospective dancers are lead through a series of considerations and encouraged to think carefully and to make wise decisions. Written primarily as a guide book for parents, it is just as useful for teachers and this exemplary document would do well to have a place on the bookshelf in every dance studio waiting room. Not only can dance parents learn from this informative text, but dance teachers can be nudged toward a greater understanding and anticipation of parents' needs and questions. *Getting Started in Ballet* fills a gap conveniently under one cover, welcoming parents to regard every aspect of their child's possible future in dance. Without this book, there would be little documentation of the parenting aspect of dance. Dance is unlike any other training or field, and knowing how to guide a young dancer can make or break them as a dancer or dance lover. [Musculoskeletal Injections Manual](#) Baris Kocaoglu, Lior Laver, Laura de Girolamo, Riccardo Compagnoni, 2024-03-21. This book presents a comprehensive and updated overview of musculoskeletal injections with biologic and non biologic injectable agents, a new trend of treatment in orthopaedics and sports medicine. This ESSKA book incorporates internal ongoing debates fostered by ESSKA U45 Committee and ESSKA's Orthobiologics Initiative ORBIT, which enroll a broad international group of dedicated clinicians and researchers. The topics covered mirror this fast evolving field, which ranges from basic science knowledge to treatment options in sports traumatology. Renowned experts in the field examine and critically discuss each aspect, including existing controversies concerning indications and applications, as well as the choice between biologic and non biologic injections. Clear practical indications, subdivided by anatomical region and supported by a wealth of intra-procedural images, are aimed to support young surgeons in the application of musculoskeletal injections. Written by an international panel of clinicians and researchers active in the field of orthobiology and sports medicine, this manual is an invaluable reference tool for all those involved in injectional therapies and sports traumatology. The capacity to write rebelliously in varying registers and voices, tempos and volumes, as

featured across this book is boundaryless In this edited volume we ask new questions which simultaneously trouble and open up what the product and performance of academic work words and worlds might come to be At the heart of this book we move between departing radically from academic writing to arriving at a new academic endeavor and transaction between reader and text driven by the invitation to open rebellion in academic research and writing This unique volume brings together an extraordinary range of international scholars researchers and artists that include contemporary social scientists critical theorists visual artists poets musicians hip hoppers choreographers activists film makers theatre makers magicians and circus artists from both within and outside the academy in Europe UK India Africa USA Canada Australia and New Zealand They articulate new concepts for thinking differently generate new theories differently and present new methods of writing differently This book provides permission to depart radically in academic writing and creative practice particularly for doctoral and higher degree research students and those who work alongside them as supervisors and advisors and higher research degree educators The claim here is that rebellious departures and performances in academic research and writing are the future of academia This book provides a series of steps toward preparing for that future
