The Metamorphoses of Apuleius Carl C. Schlam, 1992 This book examines the comic and philosophical aspects of Apuleius' *Metamorphoses*, the ancient Roman novel also known as *The Golden Ass*. The tales that comprise the novel, long known for their bawdiness and wit, describe the adventures of Lucius, a man who is transformed into an ass. Carl Schlam argues that the work cannot be seen as purely comic or wholly serious; he says that the entertainment offered by the novel includes a vision of the possibilities of grace and salvation.

Architecture in Words Louise Pelletier, 2006-09-27 What if the house you are about to enter was built with the confessed purpose of seducing you of creating various sensations destined to touch your soul and make you reflect on who you are? Could architecture have such power? This was the assumption of generations of architects at the beginning of modernity. Exploring the role of theatre and fiction in defining character in architecture, Louise Pelletier examines how architecture developed to express political and social intent. Applying this to the modern day, Pelletier considers how architects can learn from these eighteenth-century attitudes in order to restore architecture's communicative dimension. Through an in-depth and interdisciplinary analysis of the beginning of modernity, Louise Pelletier encourages today's architects to consider the political and linguistic implications of their tools. Combining theory, historical studies, and research, *Architecture in Words* will provoke thought and enrich the work of any architect.

All Things Are Full of Gods David Bentley Hart, 2024-08-27 A world-renowned philosopher's genre-defying exploration of the mystery of consciousness. A masterpiece. The most thorough and rigorous account of the nature of reality to be published in a century. James Matthew Wilson, *World Magazine*. In a blossoming garden located far outside all worlds, a group of aging Greek gods have gathered to discuss the nature of existence, the mystery of mind, and whether there is a transcendent God from whom all things come. Turning to Eros, Psyche asks, "Do you see this flower, my love?" So begins David Bentley Hart's unprecedented exploration of the mystery of consciousness. Writing in the form of a Platonic dialogue, he systematically subjects the mechanical view of nature that has prevailed in Western culture for four centuries to dialectical interrogation. Powerfully rehabilitating a classical view in which mental acts are irreducible to material causes, he argues through the gods' exchanges that the foundation of all reality is spiritual or mental rather than material. The structures of mind, organic life, and even language together attest to an infinite act of intelligence in all things that we may as well call God. Engaging contemporary debates on the philosophy of mind, free will, revolutions in physics and biology, the history of science, computational models of mind, artificial intelligence, information theory, linguistics, cultural disenchantment, and the metaphysics of nature, Hart calls readers back to an enchanted world in which nature is the residence of mysterious and vital intelligences. He suggests that there is a very special wisdom to be gained when we in Psyche's words devote more time to the contemplation of living things and less to the fabrication of machines.
