William S. Allen

The Aesthetic Relation:

The Aesthetic Relation Gérard Genette, 1999 One of the best known continental theorists writing today Gérard Genette here explores our aesthetic relation to works of art Through an analysis of the views of thinkers ranging from David Hume and Immanuel Kant to Monroe C Beardsley Arthur Danto and Nelson Goodman Genette seeks to identify the place of the aesthetic in a theory of artistic appreciation His discussion is rich in detailed examples drawn from all of the arts The Aesthetic Relation is a companion volume to The Work of Art Immanence and Transcendence published by Cornell in 1997 Taken together the two books offer a comprehensive theory of art which addresses the work of art as at once object and action Genette maintains that our aesthetic relation to all types of objects presupposes that special attention is paid to their outward aspect rather than to their usefulness when appraising them Such appraisals while wholly subjective and temporary are expressed as objective and universal judgments about the items in question Further he asserts that our aesthetic relation to works of art in particular is based on an awareness of an aesthetic intention that defines an object as a work of art as well as on an awareness of a work's position in its historical and generic field

Everyday Aesthetics Katya Mandoki, 2016-04-22 Katya Mandoki advances in this book the thesis that it is not only possible but crucial to open up the field of aesthetics traditionally confined to the study of art and beauty toward the richness and complexity of everyday life She argues that in every process of communication whether face to face or through the media fashion and political propaganda there is always an excess beyond the informative and functional value of a message This excess is the aesthetic Following Huizinga's view of play as an ingredient of any social environment Mandoki explores how various cultural practices are in fact forms of playing since for the author aesthetics and play are Siamese twins One of the unique contributions of this book is the elaboration and application of a semiotic model for the simultaneous analysis of social interactions in the four registers namely visual auditory verbal and body language to detect the aesthetic strategies deployed in specific situations She argues that since the presentation of the self is targeted towards participants sensibilities aesthetics plays a key role in these modes of exchange Consequently the author updates important debates in this field to clear the way for a socio aesthetic inquiry through contexts such as the family school medical artistic or religious traditions from which social identities emerge

Forms of Experienced Environments Nathalie Blanc, Théa Manola, Patrick Degeorges, 2020-02-26 This book explores environmental forms in terms of their relationships to the socio politico ecological transformations currently in progress Today the environment is a central theme in political discourse scientific work and everyday life It is multi dimensional it is a living space a socio ecological system and a field of research and action However despite the presence and diversity of existing approaches the ways in which policies address environmental issues remain mainly focused on control highlighting the techno ecological managerial and curative dimensions of public actions Although public action tends to instrumentalise the environment the humanities and social sciences have initiated significant reflections in this field proposing alternative ways of thinking about the environment in its multiple aspects and scales As part of another approach

to the environment that mirrors contemporary developments this book adopts a form based approach which has been largely neglected by previous studies dealing with environmental themes The analyses provided here will open up a new perspective on the relationships between people aesthetics and environments and are drawn from different schools of research highlighting the huge potential of reading the environment through forms or conversely a reading of environmental forms

The Aesthetics of Development John Clammer, Ananta Kumar Giri, 2017-11-01 Through a unique range of theoretical and practical case studies this collection considers the relationship between the arts understood as the visual arts crafts theatre dance and literature and development creating both a bridge between them that is rarely explored and filling in concrete ways the content of the culture part of the equation culture and development It includes manifestations of culture and the ways in which they relate to development and in turn contribute to such pressing issues as poverty alleviation concern for the environment health empowerment and identity formation It shows how the arts are an essential part of the concrete understanding of culture and as such a significant part of development thinking including the development of culture and not only of culture as an instrumental means to promote other development goals *Adorno, Aesthetics, Dissonance* William S. Allen, 2022-10-06 Adorno's aesthetics are one of the most important philosophical analyses of the 20th century but their development remains unclear Adorno Aesthetics Dissonance is the first book to provide a detailed study of how Adorno's thinking of aesthetics developed and to show the different dimensions that came together to make it uniquely powerful Principal among these dimensions are his intense interest in music and his historical and materialist approach In addition by studying how Adorno's aesthetics arose through interactions with different thinkers particularly Kracauer Horkheimer and Schoenberg it becomes clear that his thought changes in its relation to dialectics As a result Adorno's thinking comes to broaden the understanding of aesthetics to include the sphere of sensuality and in doing so transforms both aesthetics and dialectics through a notion of dissonance which in turn has substantial implications for the relation of his thinking to praxis

Dewey and the Aesthetic Unconscious Bethany Henning, 2022-03-30 John Dewey was the most celebrated and publicly engaged American philosopher in the twentieth century His naturalistic theory of experience generated new approaches to education and democracy and re grounded philosophy's search for truth in the needs of life as it is shared and lived However interpretations of Dewey after the linguistic turn have either obscured or rejected the considerable role that he gives to the non discursive dimension of experience In *Dewey and the Aesthetic Unconscious The Vital Depths of Experience* Bethany Henning argues that much classical American philosophy implicitly recognizes an unconscious dimension of mind that is distinct from Freud's theory Although the unconscious that emerges within American thought has never been treated systematically it found its fullest expression in Dewey's work particularly in his theory of aesthetic experience This dimension of mind illuminates the continuity between nature and culture and it provides us with an account of why artwork is often successful at communicating meanings from the ecological and intimate dimensions of life where discourse often fails If the

relationship between the human and the organic world has emerged as the definitive question of twenty first century life then the aesthetic unconscious stands as a resource for our ecological and intimate well being

The Aesthetics of Scientific Data Representation Lotte Philipsen, Rikke Schmidt Kjærgaard, 2017-08-22 How can cartoon images aid in understanding bacterial biological processes What prompts physicists to blur their images before showing them to biologists Considering that the astronomer's data consists solely of invisible electric impulses what is the difference between representing outer space as images graphs or sound How does a work of contemporary art differ from a scientific image if we cannot visually distinguish between the two How do aesthetics art and design influence scientific visualization and vice versa This volume asks critically important questions about scientific data representation and provides significant insights to a field that is interdisciplinary in its very core The authors investigate scientific data representation through the joint optics of the humanities and natural sciences The volume particularly appeals to scholars in visual and aesthetic studies data visualization scientific illustration experience culture information design and science communication

The Aesthetics and Politics of the Crowd in American Literature Mary Esteve, 2003-02-27 Mary Esteve provides a study of crowd representations in American literature from the antebellum era to the early twentieth century As a central icon of political and cultural democracy the crowd occupies a prominent place in the American literary and cultural landscape Esteve examines a range of writing by Poe Hawthorne Lydia Maria Child Du Bois James and Stephen Crane among others These writers she argues distinguish between the aesthetics of immersion in a crowd and the mode of collectivity demanded of political liberal subjects In their representations of everyday crowds ranging from streams of urban pedestrians to swarms of train travellers from upper class parties to lower class revivalist meetings such authors seize on the political problems facing a mass liberal democracy problems such as the stipulations of citizenship nation formation mass immigration and the emergence of mass media Esteve examines both the aesthetic and political meanings of such urban crowd scenes

The Aesthetics of Digital Montage Marc Furstenau, 2025-10-01 Tracing the recent changes to the technology of film editing this book offers an account of the aesthetics of digital montage It is commonly argued that the changes to the

technical apparatus of editing the emergence of new systems for digital editing have altered the basic identity or ontology of the cinema as an art Such claims it is argued in this book are based on a misunderstanding of the relation between technology and technique and more generally between the technical and the aesthetic Applying recent theories of art and employing specific concepts from philosophical aesthetics an account of cinematic art is offered that can better accommodate the kinds of technical changes that have occurred in recent decades with the advent of computer technology in the cinema An aesthetics of digital montage is presented as part of a more general proposal for a theory of technical change in the cinema
