The SAGE Encyclopedia of African Cultural Heritage in North America Mwalimu J. Shujaa,Kenya J. Shujaa,2015-07-13 The Encyclopedia of African Cultural Heritage in North America provides an accessible ready reference on the retention and continuity of African culture within the United States Our conceptual framework holds first that culture is a form of self knowledge and knowledge about self in the world as transmitted from one person to another Second that African people continuously create their own cultural history as they move through time and space Third that African descended people living outside of Africa are also contributors to and participate in the creation of African cultural history Entries focus on illuminating Africanisms cultural retentions traceable to an African origin and cultural continuities ongoing practices and processes through which African culture continues to be created and formed Thus the focus is more culturally specific and less concerned with the broader transatlantic demographic political and geographic issues that are the focus of similar recent reference works We also focus less on biographies of individuals and political and economic ties and more on processes and manifestations of African cultural heritage and continuity FEATURES A two volume A to Z work available in a choice of print or electronic formats 350 signed entries each concluding with Cross references and Further Readings 150 figures and photos Front matter consisting of an Introduction and a Reader's Guide organizing entries thematically to more easily guide users to related entries Signed articles concluding with cross references

An American Health Dilemma W. Michael Byrd,Linda A. Clayton,2012-10-02 At times mirroring and at times shockingly disparate to the rise of traditional white American medicine the history of African American health care is a story of traditional healers root doctors granny midwives underappreciated and overworked African American physicians scrupulous and unscrupulous white doctors and scientists governmental support and neglect epidemics and poverty Virtually every part of this story revolves around race More than 50 years after the publication of An American Dilemma Gunnar Myrdal's 1944 classic about race relations in the USA An American Health Dilemma presents a

comprehensive and groundbreaking history and social analysis of race relations and the African American medical and public health experience Beginning with the origins of western medicine and science in Egypt Greece and Rome the authors explore the relationship between race medicine and health care from the precursors of American science and medicine through the days of the slave trade with the harrowing middle passage and equally deadly breaking in period through the Civil War and the gains of reconstruction and the reversals caused by Jim Crow laws It offers an extensive examination of the history of intellectual and scientific racism that evolved to give sanction to the mistreatment medical abuse and neglect of African Americans and other non white people Also included are biographical portraits of black medical pioneers like James McCune Smith the first African American to earn a degree from a European university and anecdotal vignettes like the tragic story of the Hottentot Venus which illustrate larger themes An American Health Dilemma promises to become an irreplaceable and essential look at African American and medical history and will provide an invaluable baseline for future exploration of race and racism in the American health system

The Power of African Cultures Toyin Falola, 2003 An analysis of the ties between culture and every aspect of African life using Africa's past to explain present situations This book focuses on the modern cultures of Africa from the consequences of the imposition of Western rule to the current struggles to define national identities in the context of neo liberal economic policies and globalization The book argues that it is against the backdrop of foreign influences that Africa has defined for itself notions of identity and development African cultures have been evolving in response to change and in other ways solidly rooted in a shared past The book successfully deconstructs the last one hundred and fifty years of cultures that have been disrupted replaced and resurrected The Power of African Cultures challenges many preconceived notions such as male dominance and female submission the supposed unity of ethnic groups and contemporary Western stereotypes of Africans It also shows the dynamism of African cultures to adapt to foreign imposition even as colonial rule forced the adoption of foreign institutions and cultures African cultures appropriated these elements Traditions were reworked symbols redefined and the past situated in contemporary problems in order to accommodate the modern era Toyin Falola is a Fellow of the Nigerian Academy of Letters and Fellow of the Historical Society of Nigeria He is the recipient of the 2006 Cheikh Anta Diop Award for Exemplary Scholarship in African Studies and the 2008 Quintessence Award by the Africa Writers Endowment He holds an honorary doctorate from Monmouth University and he is University Distinguished Teaching Professor at the University of Texas at Austin where he is also the Jacob and Frances Sanger Mossiker Chair in the Humanities His books include Nationalism and African Intellectuals and Violence in Nigeria both from the University of Rochester Press
