The Africanamerican Image In Crisis:

The African-American Image in Crisis Sidney Rahim Sharif, 1985-01-01 *Word, Image, and the New Negro* Anne Elizabeth Carroll, 2005 This book focuses on the collaborative illustrated volumes published during the Harlem Renaissance in which African Americans used written and visual texts to shape ideas about themselves and to redefine African American identity Anne Elizabeth Carroll argues that these volumes show how participants in the movement engaged in the processes of representation and identity formation in sophisticated and largely successful ways Though they have received little scholarly attention these volumes constitute an important aspect of the cultural production of the Harlem Renaissance *Word Image and the New Negro* marks the beginning of a long overdue recovery of this legacy and points the way to a greater understanding of the potential of texts to influence social change Anne Elizabeth Carroll is Assistant Professor of English at Wichita State University

The Black Image in the White Mind Robert M. Entman, Andrew Rojecki, 2024-05-31 Living in a segregated society white Americans learn about African Americans not through personal relationships but through the images the media show them *The Black Image in the White Mind* offers the most comprehensive look at the intricate racial patterns in the mass media and how they shape the ambivalent attitudes of Whites toward Blacks Using the media and especially television as barometers of race relations Robert Entman and Andrew Rojecki explore but then go beyond the treatment of African Americans on network and local news to incisively uncover the messages sent about race by the entertainment industry from prime time dramas and sitcoms to commercials and Hollywood movies While the authors find very little in the media that intentionally promotes racism they find even less that advances racial harmony They reveal instead a subtle pattern of images that while making room for Blacks implies a racial hierarchy with Whites on top and promotes a sense of difference and conflict Commercials for example feature plenty of Black characters But unlike Whites they rarely speak to or touch one another In prime time the few Blacks who escape sitcom buffoonery rarely enjoy informal friendly contact with White colleagues perhaps reinforcing social distance in real life Entman and Rojecki interweave such astute observations with candid interviews of White Americans that make clear how these images of racial difference insinuate themselves into Whites thinking Despite its disturbing readings of television and film the book's cogent analyses and proposed policy guidelines offer hope that America's powerful mediated racial separation can be successfully bridged Entman and Rojecki look at how television news focuses on black poverty and crime out of proportion to the material reality of black lives how black experts are only interviewed for black themed issues and how black politics are distorted in the news and conclude that while there are more images of African Americans on television now than there were years ago these images often don't reflect a commitment to racial comity or community building between the races Thoroughly researched and convincingly argued Publishers Weekly Drawing on their own research and that of a wide array of other scholars Entman and Rojecki present a great deal of provocative data showing a general tendency to devalue blacks or force them into stock

Thompson, 2002-01-30 For decades researchers and policymakers have grappled with the issue of the underachievement of African American students An age old problem has been that these students on average lag behind their peers of other racial ethnic groups in math science and reading Recently California like some other states has implemented a high stakes standardized testing program that has revealed that when test scores are disaggregated along racial ethnic lines the scores of African American students continue to trail those of their peers The study described in this book was undertaken in an effort to uncover schooling practices that

are advantageous or detrimental to the achievement of African American students The study was based on interviews and questionnaire results from nearly 300 African American high school seniors Most of these students resided in a region that had a low college attendance rate and a high child poverty rate The students were given an opportunity to discuss numerous issues pertaining to their schooling experiences including teacher attitudes and expectations the curriculum homework practices the quality of services provided by their high school counselors racism at school school safety parental involvement and their early reading habits and attitudes about reading In addition to quantitative results most chapters include detailed narratives describing the elementary and secondary schooling experiences of the interviewees **Modern Look** Mason

American Images of the Vietnam War Riverside Katherine Kinney Associate Professor of English University of California,2000-10-09 Hundreds of memoirs novels plays and movies have been devoted to the American war in Vietnam In spite of the great variety of mediums political perspectives and the degrees of seriousness with which the war has been treated Katherine Kinney argues that the vast majority of these works share a single story that of Americans killing Americans in Vietnam Friendly Fire in this instance refers not merely to a tragic error of war it also refers to America s war with itself during the Vietnam years Starting from this point this book considers the concept of friendly fire from multiple vantage points and portrays the Vietnam age as a crucible where America s cohesive image of itself is shattered pitting soldiers against superiors doves against hawks feminism against patriarchy racial fear against racial tolerance Through the use of extensive evidence from the film and popular fiction of Vietnam i e Kovic s Born on the Fourth of July Didion s Democracy O Brien s Going After Cacciato Rabe s Sticks and Bones and Streamers Kinney draws a powerful picture of a nation politically culturally and socially divided and a war that has been memorialized as a contested site of art media politics and ideology *The Impact of Race on U.S. Foreign Policy* Michael L. Krenn,2020-08-26 This book shows that race has

played an important role in the nation's foreign relations from the time the first English colonists clambered onto the shores of the North American continent. It also shows that the colonists had already progressed rather far in defining themselves in racial terms. *African Americans in U.S. Foreign Policy* Linda Heywood, Allison Blakely, Charles Stith, Joshua C.

Yesnowitz, 2015-01-30 Bookended by remarks from African American diplomats Walter C. Carrington and Charles Stith, the essays in this volume use close readings of speeches, letters, historical archives, diaries, memoirs of policymakers and newly available FBI files to confront much neglected questions related to race and foreign relations in the United States. Why, for instance, did African Americans profess loyalty and support for the diplomatic initiatives of a nation that undermined their social, political and economic well-being through racist policies and cultural practices? Other contributions explore African Americans' history in the diplomatic and consular services and the influential roles of cultural ambassadors like Joe Louis and Louis Armstrong. The volume concludes with an analysis of the effects on race and foreign policy in the administration of Barack Obama. Groundbreaking and critical, *African Americans in U.S. Foreign Policy* expands on the scope and themes of recent collections to offer the most up-to-date scholarship to students in a range of disciplines including U.S. and African American history, Africana studies, political science and American studies. *A Comparison of the African-American Presence in an Earlier and Later American History Textbook* Cora Lee Upshur-Ransome, 2000

A Comparison of the African American Presence in an Earlier and Later American History Textbook Deconstructing Images of the Global South Through Media Representations and Communication Endong, Floribert Patrick C., 2019-12-06 The human condition has continued to improve phenomenally in today's world with the development of technology and medicine. This includes developing countries in areas such as Africa, Asia and South America. Despite the emergence of economy, education and infrastructure in these regions, media outlets continue to forego their advancements in favor of the negativities that plague these states, such as poverty, hunger and corruption. There is a need to research international media portrayals of the less developed world to ascertain the myth that these areas are still struggling. *Deconstructing Images of the Global South Through Media Representations and Communication* provides emerging research exploring the theoretical and practical aspects of how global media analyzes developing countries. Featuring coverage on a broad range of topics such as cultural affirmation, online platforms and audience perception, this book is ideally designed for communications specialists, journalists, broadcasters, newscasters, conflict photographers, media practitioners, policymakers, international relation experts, column writers, editors, students, politicians, government officials, researchers and academicians seeking current research on the world's perception of developing countries through media coverage. *Schooling the Movement* Derrick P. Alridge, Jon N. Hale, Tondra L. Loder-Jackson, 2023-04-20 A fresh examination of teacher activism during the civil rights movement. Southern Black educators were central contributors and activists in the civil rights movement. They contributed to the movement through their classrooms, schools, universities and communities. Drawing on oral history interviews and archival research, *Schooling*

the Movement examines the pedagogical activism and vital contributions of Black teachers throughout the Black freedom struggle By illuminating teachers activism during the long civil rights movement the editors and contributors connect the past with the present contextualizing teachers longstanding role as advocates for social justice Schooling the Movement moves beyond the prevailing understanding that activism was defined solely by litigation and direct action forms of protest The contributors broaden our conceptions of what it meant to actively take part in or contribute to the civil rights movement

Hope on the Brink Lewis Brogdon,2013-05-29 African Americans have always wrestled with hopelessness Yet in the face of hopelessness African Americans fought for hope that America can be a land of equality opportunity and justice The fight for hope has been difficult and has taken a toll on African Americans Today the signs of hopelessness abound in black communities across the nation as an increasing number of leaders express concern about a pervasive problem that they could not identify Beyond the continuing injustices and inequities linked to systemic racism they recognize a growing internal apathy in African Americans This internal apathy is nihilism the embrace of nothingness meaninglessness and internalized oppression Nihilism has been slowly emerging since the 1980s and is the reason there is an increasing number of blacks who turn to defeating and destructive behaviors that only worsen their plight In nihilism s wake leaders and communities are left trying to help people who have turned on themselves and abandoned hope that things can get better The first step toward hope requires an understanding of hopelessness Only then can we step into a world that pushes people to the brink and hope to make a difference Hope on the Brink offers an exploration into this hopelessness
