**The age of capital : 1848 - 1875** Eric John Hobsbawm,1995      *Age Of Capital: 1848-1875* Eric Hobsbawm,2010-12-16

A magisterial account of the rise of capitalism Eric Hobsbawm s magnificent treatment of the crucial years 1848 1875 is a penetrating analysis of the rise of capitalism and the consolidation of bourgeois culture In the 1860s a new word entered the economic and political vocabulary of the world capitalism The global triumph of capitalism is the major theme of history in the decades after 1848 The extension of capitalist economy to four corners of the globe the mounting concentration of wealth the migration of men the domination of Europe and European culture made the third quarter of the nineteenth century a watershed This is a history not only of Europe but of the world Eric Hobsbawm s intention is not to summarise facts but to draw facts together into a historical synthesis to make sense of the period and to trace the roots of the present world back to it He integrates economics with political and intellectual developments in this objective yet original account of revolution and the failure of revolution of the cycles of boom and slump that characterise capitalist economies of the victims and victors of the bourgeois ethos

**Chicago in the Age of Capital** John B. Jentz,Richard Schneirov,2012-04-15 In this sweeping interpretive history of mid nineteenth century Chicago historians John B Jentz and Richard Schneirov boldly trace the evolution of a modern social order Combining a mastery of historical and political detail with a sophisticated theoretical frame Jentz and Schneirov examine the dramatic capitalist transition in Chicago during the critical decades from the 1850s through the 1870s a period that saw the rise of a permanent wage worker class and the formation of an industrial upper class Jentz and Schneirov demonstrate how a new political economy based on wage labor and capital accumulation in manufacturing superseded an older mercantile economy that relied on speculative trading and artisan production The city s leading business interests were unable to stabilize their new system without the participation of the new working class a German and Irish ethnic mix that included radical ideas transplanted from Europe Jentz and Schneirov examine how debates over slave labor were transformed into debates over free labor as the city s wage earning working class developed a distinctive culture and politics The new social movements that arose in this era labor socialism urban populism businessmen s municipal reform Protestant revivalism and women s activism constituted the substance of a new post bellum democratic politics that took shape in the 1860s and 70s When the Depression of 1873 brought increased crime and financial panic Chicago s new upper class developed municipal reform in an attempt to reassert its leadership Setting local detail against a national canvas of partisan ideology and the seismic structural shifts of Reconstruction Chicago in the Age of Capital vividly depicts the upheavals integral to building capitalism      [The Age of Monopoly Capital](#) Paul A. Climate and Capital in the Age of Petroleum Jeff Diamanti, 2021-05-20 Jeff Diamanti describes the destructive relationship between climate and capital through the exponential growth of the petroleum industry over the last 40 years Building on key insights in the environmental and energy humanities Diamanti introduces the concept of the terminal landscape as a site of storage transformation and transition essential to critical ecology in the 21st century Climate and Capital in the Age of Petroleum presents these scenes of transformation as sites through which post industrial capitalism distributes fossil fuels into the world Diamanti uses this concept to redefine the post industrial landscape by revealing the global flows of exchange and storage that precede the distribution of fossil fuels into the world as social form Advancing a new media theory of energy fossil fuels and other finite resources become new types of distributable media Through this line of thinking the book makes solid connections between media technologies and energy cultures that help to shape a radical critique of the current energy infrastructure that characterises global capitalism Arguing that this infrastructure rests on millennia of compact matter centuries of colonial violence and decades of technological development Diamanti's analysis deepens our understanding of the environment as a terminal landscape through case studies of oil companies countries artworks and historical events Using his under examined typology of global energy further theorises and politicises the climate crisis for scholars and activists alike
