Narratives of Loneliness Olivia Sagan, Eric Miller, 2017-09-28 Rising life expectancies and declining social capital in the developed world mean that an increasing number of people are likely to experience some form of loneliness in their lifetimes than ever before Narratives of Loneliness tackles some of the most pressing issues related to loneliness showing that whilst recent policies on social integration community building and volunteering may go some way to giving an illusion of not being alone ultimately they offer a rhetoric of togetherness that

may be more seductive than ameliorative as the condition and experience of loneliness is far more complex than commonly perceived. Containing thought provoking contributions from researchers and commentators in several countries this important work challenges us to rethink some of the burning issues of our day with specific reference to the causes and consequences of loneliness. Topics include the loneliness and mental health of military personnel, loneliness and social media, loneliness and sexuality, urban loneliness and the experiences of transnational movement and adopted children. This book therefore makes an overdue multidisciplinary contribution to the emerging debate about how best to deal with loneliness in a world that combines greater and faster connectedness on the one hand with more intensely experienced isolation on the other. Since Emile Durkheim first claimed that the structure of society could have a strong bearing on psychological health in the 1890s, researchers in a range of disciplines have explored the probable impact of social context on mental health and wellbeing. Interdisciplinary in approach, *Narratives of Loneliness* will therefore be of great interest to academics, postgraduate students and researchers in social sciences, the arts, psychology and psychiatry.

Rationality, Hermeneutics and Dialogue
Paul Healy, 2017-11-30

What is rationality and how are we to conceive of it today given the major theoretical changes that have profoundly altered our philosophical self understanding? *Rationality, Hermeneutics and Dialogue* develops a systematic response to these questions, defending an approach to rationality that can meet the demands of a postfoundationalist and pluralistic era. Engaging critically with the work of Habermas, Gadamer and Foucault, Healy makes the case for a dialogical approach to rationality as a fitting response to postfoundationalist needs. As well as advancing existing scholarship on these theorists, *Rationality, Hermeneutics and Dialogue* contributes to filling a significant lacuna in the literature on rationality as prefigured by Richard Bernstein and others. By showing how the dialogical approach can resolve two challenging contemporary problems for rationality, it demonstrates how critical engagement with the Continental tradition can facilitate the resolution of aporias arising within the Analytic tradition. It thereby sets the scene for a productive and potentially provocative debate about rationality in the twenty first century.
