Dichmann Pallis, 1926 *The Palmyrenes of Dura-Europos* Lucinda Dirven, 2015-08-27 This volume deals with the religion of Palmyrenes in Dura Europos during the first three centuries of the Common Era and focuses upon the religious interaction between this migrant community and their new residence By studying the religious interaction of distinct groups on a local level this study aims to contribute to a better understanding of the process of religious development and change in Syria during the Roman period Information on the Palmyrenes of Dura Europos consists primarily of archaeological remains that have been found there The Palmyrene materials from Dura Europos have never been published collectively and for this reason they are enumerated and re evaluated in the appendix The book is richly illustrated with 20 figures and 22 plates

Ritual Catherine Bell, From handshakes and toasts to chant and genuflection ritual pervades our social interactions and religious practices Still few of us could identify all of our daily and festal ritual behaviors much less explain them to an outsider Similarly because of the variety of activities that qualify as ritual and their many contradictory yet in many ways equally legitimate interpretations ritual seems to elude any systematic historical and comparative scrutiny In this book Catherine Bell offers a practical introduction to ritual practice and its study she surveys the most influential theories of religion and ritual the major categories of ritual activity and the key debates that have shaped our understanding of ritualism Bell refuses to nail down ritual with any one definition or understanding Instead her purpose is to reveal how definitions emerge and evolve and to help us become more familiar with the interplay of tradition exigency and self expression that goes into constructing this complex social medium *An Introduction to Ancient Mesopotamian Religion* Tammi J.

Schneider, 2011-06 In her book the author offers readers a compact guide to the religion of the peoples living in the region of the Tigris and Euphrates rivers from the beginning of the Bronze Age to the time of Alexander the Great and Darius III Drawing on extant texts artifacts and architecture Schneider uncovers both an intriguing pantheon of deities including Marduk Ishtar and many others and the complex fluid and highly ritualized religious experience of the people who spent their lives serving and appeasing them

Ritual Catherine M. Bell, 1997 Catherine Bell provides a practical introduction to ritual and its study with comprehensive overviews of the most influential theories of religion and ritual The book examines the major categories of ritual activity

Traditional Festivals Christian Roy, 2005-06-29 This illustrated reference work covers a wide range of festivals that have sacred origins and are or have been part of a folk tradition a world religion or a major civilization Traditional Festivals A Multicultural Encyclopedia travels around the world and across the centuries to uncover an often unexpected richness of meaning in some of the major sacred festivals of the world s religions the hallowed calendars

of ancient civilizations and the seasonal celebrations of tribal cultures From Akitu to Yom Kippur its 150 entries look at the content and context of these festivals from a number of perspectives including those relating to theology anthropology folklore and social theory tracing their historical development and variations across cultures Readers will get a vivid sense of what each festival means to the people celebrating it how each captures its culture s beliefs hopes and fears founding myths and redemptive visions and how each expresses the universal need of humans to connect their lives to a timeless spiritual dimension

Religions of the Ancient World Sarah Iles Johnston,2004-11-30 This groundbreaking first basic reference work on ancient religious beliefs collects and organizes available information on ten ancient cultures and traditions including Greece Rome and Mesopotamia and offers an expansive comparative perspective on each one

Origin and Transformation of the Ancient Israelite Festival Calendar Jan A. Wagenaar,2005 The book focusses on the origin and transformation of the priestly festival calendar Since the epoch making work of Julius Wellhausen at the end of the 19th century the differences between the various ancient Israelite festival calendars have often been explained in terms of a gradual evolution which shows an increasing historicisation denaturalisation and ritualisation The festivals were in Wellhausen s view gradually detached from agricultural conditions and celebrated more and more at fixed points in the year This study tries to show that the changes in the priestly festival calendar reflect a conscious effort to adapt the ancient Israelite festival calendar to the semi annual layout of the Babylonian festival year The ramifications of the change only come to the fore after a careful study of the agricultural conditions of ancient Israel and Mesopotamia makes clear that passover and the festival of unleavened bread were originally celebrated in the second month of the year The first month of the year envisaged by the priestly festival calendar for the celebration of passover and the festival of unleavened bread in turn mirrors the date of one of the two semi annual Babylonian New Year festivals The two Babylonian New Year festivals were celebrated exactly six months apart at the vernal and autumnal equinoxes In order to adapt the ancient Israelite festival calendar to the Babylonian scheme with two New Year festivals a year the date of passover and the festival of unleavened bread had to be moved up by one month The consequences for the origin of passover the festival of unleavened bread the festival of weeks and the festival of huts are charted and the relations between the various ancient Israelite festival calendars are determined anew

Decalogue based on a comparison to ancient Levantine monuments The Akītu Festival Jule Bidmead, 2004 Religious ritual is embedded with socio political ideologies Nowhere is this more apparent than in the ancient Babylonian akītu or New Year festival The akītu festival is one of the oldest recorded religious festivals in the world celebrated for several millennia throughout ancient Mesopotamia Yet the akītu was more than just a religious ceremony it acted as a political device employed by the monarchy and or the central priesthood to ensure the supremacy of the king the national god and his capital city Using tools of social anthropology and ritual analysis this book presents a detailed reconstruction of the festival events and its attendant rituals to demonstrate how the akītu festival became a propagandistic tool wielded by the monarchy and ruling class to promote state ideology The akītu festival demonstrates the effectiveness of religion as a political tool

World Festivals Oliver Scott, AI, 2025-03-06 World Festivals explores the fascinating world of cultural celebrations and global traditions highlighting the profound impact of these events on communities worldwide Festivals are not just about having fun they are critical to cultural heritage reinforcing cultural identity and preserving collective memory Readers will discover how festivals often originate from agricultural cycles religious observances or historical events evolving over centuries to reflect changing societal values This book offers a unique lens through which to view world history and understand the social impact of shared rituals The book progresses systematically beginning with the historical origins of festivals and moving into specific categories like harvest festivals and religious celebrations It then examines the social impact of festivals including their role in community building and tourism What sets this book apart is its global perspective drawing on historical texts ethnographic studies and firsthand accounts to compare and contrast festivals across different cultures Ultimately World Festivals argues that these celebrations are vital expressions of human culture fostering empathy and promoting cross cultural understanding in an increasingly interconnected world **The Liberating Image** J. Richard Middleton, 2005-03 Offers a deeply informed take on a key Christian doctrine and its interpretation and relevance today

Babylonian Time Emma Johnson, AI, 2025-03-04 Babylonian Time explores the origins of our modern timekeeping methods revealing the sophisticated astronomical and mathematical systems of ancient Mesopotamia It details how the Babylonians ingeniously predicted eclipses and shaped our perception of time The book highlights the development and application of their sexagesimal system a base 60 number system which influenced everything from measuring angles to dividing time into hours minutes and seconds a legacy still present today It further shows how meticulous observations recorded on cuneiform tablets enabled these predictions and advanced their calendar systems The book provides historical context explaining the social and political structure of ancient Mesopotamia and the role of priests and scribes in astronomical observation It progresses by examining Babylonian mathematical techniques for predicting eclipses exploring their calendar systems used to regulate agricultural cycles and religious observances and analyzing the transmission of Babylonian astronomical knowledge to other cultures including the Greeks By examining cuneiform texts and archaeological findings Babylonian Time

demonstrates how echoes of Babylonian thought are still audible in our daily lives Myths and Legends of the Ancient Near East: Religion, Cosmology, and Sacred Texts from Egypt, Mesopotamia, and Ugarit AJ Carmichael, 2025-08-04

Mesopotamia the land between the rivers lies cradled by the Tigris and Euphrates In the modern world this area encompasses Iraq northeastern Syria southeastern Turkey and southwestern Iran To the ancient mind it was a liminal place where the forces of life and death were ever in tension Fertile soil gave birth to the first great urban civilizations but it was bordered by deserts mountains and marshes that represented the dangerous and unknown The Tigris River with its fast flowing volatile currents was feared and revered as a force of divine energy The Euphrates broader and gentler was a lifeline for irrigation and agriculture Together they deposited the silt that fed barley and wheat creating the agricultural surplus that allowed cities like Uruk Ur Eridu and Lagash to flourish as early as 4000 BCE Yet both rivers could turn catastrophic flooding with little warning destroying fields homes and lives These unpredictable floods found their echo in the Flood Myth the story of Ziusudra later Utnapishtim surviving the deluge decreed by angry gods
