The Changing Face of Corpus Linguistics Antoinette Renouf, Andrew Kehoe, 2006 This volume is witness to a spirited and fruitful period in the evolution of corpus linguistics In twenty two articles written by established corpus linguists members of the ICAME International Computer Archive of Modern and Mediaeval English association this new volume brings the reader up to date with the cycle of activities which make up this field of study as it is today dealing with corpus creation language varieties diachronic corpus study from the past to present present day synchronic corpus study the web as corpus and corpus linguistics and grammatical theory It thus serves as a valuable guide to the state of the art for linguistic researchers teachers and language learners of all persuasions After over twenty years of evolution corpus linguistics has matured incorporating nowadays not just small medium and large primary corpus building but also specialised and multi dimensional secondary corpus building not just corpus analysis but also corpus evaluation not just an initial application of theory but self reflection and a new concern with theory in the light of experience The volume also highlights the growing emphasis on language as a changing phenomenon both in terms of established historical study and the newer short range diachronic study of 20th century and current English and the growing area of overlap between these two Another section of the volume illustrates the recent changes in the definition of corpus which have come about due to the emergence of new technologies and in particular of the availability of texts on the world wide web The volume culminates in the contributions by a group of corpus grammarians to a timely and novel discussion panel on the relationship between corpus linguistics and grammatical theory

Catastrophes and Unexpected Behavior Patterns in Complex Artificial Populations Stanislaw

Raczynski, 2021-07-05 A major objective of this monograph is to present an agent based simulation of artificial populations The focus is on possible unexpected or catastrophic events that may spontaneously appear in simulations A short recall of the tenets of the theory of catastrophes is given Several examples of artificial society simulations are provided as the main topic of the book With agent based modeling possible catastrophes and unexpected events in artificial populations are simulated The book presents a new modeling and simulation tool applied to social system simulation The models are coded in the object

and agent oriented language Bluesss Blues Simulation System related to the C language The program code consists of a series of generic declarations of processes Each of them includes a number of events that are coded in C At the runtime a population of objects is generated All the objects agents start to execute their own events and interact with one another During the simulations it is possible to observe the macro behavior of the population where some unexpected or catastrophic events occur The examples include a stock market crash catastrophes in extended prey predator systems growing organisms and cancer epidemics social inequality and economic decay mass service systems and more Remarks on possible simultaneous events are also included

Value-Focused Business Process Engineering : a Systems Approach Dina Neiger, Leonid Churilov, Andrew Flitman, 2008-12-16 One of the keys to successful business process engineering is tight alignment of processes with organisational goals and values Historically however it has always been difficult to relate different levels of organizational processes to the strategic and operational objectives of a complex organization with many interrelated and interdependent processes and goals This lack of integration is especially well recognized within the Human Resource Management HRM discipline where there is a clearly defined need for greater alignment of HRM processes with the overall organizational objectives Value Focused Business Process Engineering is a monograph that combines and extends the best on offer in Information Systems and Operations Research Decision Sciences modelling paradigms to facilitate gains in both business efficiency and business effectiveness
