Education, Space and Urban Planning Angela Million, Anna Juliane Heinrich, Thomas Coelen, 2016-07-26 This book examines a range of practical developments that are happening in education as conducted in urban settings across different scales It contains insights that draw upon the fields of urban planning urbanism geography architecture education and pedagogy It brings together current thinking and practical experience from German and international perspectives This discussion is organised in four segments schools and the neighbourhood education and the neighbourhood education and the city and finally education and the region Contributors cover a wide range of contemporary and significant socio political aspects of education over the last decade They reinforce emergent thinking that space and its urban context are important dimensions of education This book also underscores the need for more research in the relationships between education and

urban development itself Current urban planning does not fully connect our understanding in education with what we know in the spatial and planning sciences Accordingly this release is an early attempt to bring together a growing body of integrated and interdisciplinary reflection on education theory and practice
