Teaching about Technology Marc J. de Vries, 2016-06-27 This book provides an introduction to the philosophy of technology that is accessible to non philosophers It offers a survey of the current state of affairs in the philosophy of technology and also discusses the relevance of that for teaching about technology The book includes questions and assignments and offers an extensive annotated bibliography for those who want to read more about the discipline

Teaching about Technology Marc J. de Vries, 2005-08-17 Teaching about technology at all levels of education can only be done properly when those who teach have a clear idea about what it is that they teach In other words they should be able to give a decent answer to the question what is technology In the philosophy of technology that question is explored Therefore the philosophy of technology is a discipline with a high relevance for those who teach about technology Literature in this field though is not always easy to access for non philosophers This book provides an introduction to the philosophy of technology for such people It offers a survey of the current state of affairs in the philosophy of technology and also discusses the relevance of that for teaching about technology The book can be used in introductory courses on the philosophy of technology in teacher education programs engineering education programs and by individual educators that are interested in the intriguing phenomenon of technology that is so important in our contemporary society The Bloomsbury Handbook of

Technology Education David Gill, Dawne Irving-Bell, Matt McLain, David Wooff, 2023-04-20 The Bloomsbury Handbook of Technology Education draws together international perspectives on contemporary praxis in technology education from philosophy to empirical research Through carefully commissioned chapters leading authors explore the fundamentals of technology education curriculum and pedagogy Chapters discuss technology education as it can be experienced by children and young people inside and outside of the classroom across the world as well as the importance of technology and the history and philosophical origins of technology education Carefully curated this is an innovative and exciting volume for students teachers teacher educators researchers lecturers and professors in technology education **Technology**

Education for Teachers P. John Williams, 2013-02-11 This is a textbook for use in technology teacher training and also a reference book for technology teachers It will provide a foundation for new teachers entering the area of technology and also the opportunity for practicing teachers to keep up to date with research informed ideas about teaching technology Technology in the curriculum has continually faced a range of challenges throughout its history in many countries Often the basis of the challenges is the result of a lack of understanding about good technology practice It is hoped that this book can encourage excellent practice in technology teaching and so increase the number of schools positively engaged with technology The chapter authors are internationally respected and experienced educators who have been able to draw on both their teaching experience and their research in order to discuss a range of aspects of teaching technology The book has been developed with an international audience in mind While authors are naturally most familiar with their own country efforts

have been made to generalize from the principles of sound theory and research based practice to maximize applicability to local contexts John Williams is the Director of the Technology Environmental Mathematics and Science Education Research Centre at the University of Waikato in New Zealand He has worked as a designer and builder and began his career as a secondary school Manual Arts teacher He has taught and studied in Australia and the USA and in a number of African and Indian Ocean countries He has published and presented widely and enjoys fishing
