Teaching And Learning Pedagogy Curriculum And Culture:

Teaching and Learning Alex Moore, 2012-05-23 *Teaching and Learning Pedagogy Curriculum and Culture* is designed to share important theory with readers in an accessible but sophisticated way. It offers an overview of the key issues and dominant theories of teaching and learning as they impact upon the practice of education professionals in the classroom. This second edition has been updated to take account of significant changes in the field: young people's use of digital technologies, the increasing involvement of world of business in state education and ongoing high profile debates about assessment to name but a few. It examines the global move from traditional subject and knowledge based curricula towards skills and problem solving and discusses how the emphasis on education for citizenship has forced us to reconsider the social functions of education. Central topics also covered include an assessment of the most influential theorists of learning and teaching, the ways in which public educational policy impinges on local practice, the nature and role of language and culture in formal educational settings, an assessment of different models of good teaching, alternative models of curriculum and pedagogy. With questions, points for consideration and ideas for further reading and research throughout, this book delivers discussion and analysis designed to support understanding of classroom interactions and to contribute to improved practice. It will be essential reading for all student teachers, those engaged in professional development and Education Studies students.

Teaching and Learning: Pedagogy, Curriculum and Culture Alex Moore, 2002-11-01 Provides an overview of the key issues and dominant theories of teaching and learning as they impact upon the practice of classroom teachers. It includes questions, points for consideration and ideas for further reading and research.

Teaching and Learning Alex Moore, 2000-12 This work provides an overview of the key issues and dominant theories of teaching and learning as they impact upon the practice of classroom teachers. Punctuated by questions, points for consideration and ideas for further reading and research, the book's intention is to stimulate discussion and analysis to support understanding of classroom interactions and to contribute to improved practice. Topics covered include an assessment of dominant theories of learning and teaching, the ways in which public educational policy impinges on local practice, an assessment of different models of good teaching, including the development of whole school policies and alternative models of curriculum and pedagogy.

Pedagogy and Practice Patricia Murphy, Kathy Hall, Janet Soler, 2012-06-21 This book foregrounds pedagogy in a way that challenges readers to reflect on themselves as teachers and learners and to be reflexive about their own practices and contexts. Learning involves a transformation of identity which occurs through negotiation and repositioning through new ways of relating and through different ways of participating in practices. This book examines the meaning and implications for pedagogy in educational and workplace settings and the role of the teacher in this sociocultural view of learning. By illustrating the mediated nature of agency and identity, the chapters re-conceptualise the teacher and the learner and show different ways of supporting learning and being a teacher. The settings represented range from nursery to university and

from out of school to institutionally based and work place situations Curricular aspects represented include popular culture critical literacy multimodality the arts and new technologies Teachers and student teachers as learners are also represented in the accounts assembled The book takes a sociocultural view of learning and considers the pedagogical implications of this view It explores different meanings of pedagogy and considers notions of cultural bridging and the process of transforming identities The contributions challenge ways of thinking about practice both teaching and assessment and argue for practices that bridge between learners worlds their communities and educational institutions Drawing on the international literature this book will be essential reading for students of curriculum learning and assessment in all sectors from pre primary to further and higher education It is suitable as a core text for masters and taught doctorate programmes It will also be of interest to a wide range of professionals involved with curriculum learning and the practice of teaching and assessment This book is relevant to those in work based and professional education and training and in informal educational settings as well as traditional educational institutions at all levels A unique collection in a field that is underrepresented it will also be of interest to an academic audience *Global Issues and Comparative Education* Wendy Bignold, Liz Gayton, 2009-06-30 Almost every Education Studies degree includes an element of comparative education and this book provides an accessible undergraduate level introduction to the theme It begins by defining what is meant by the term comparative education and examines the benefits of studying it to students policy makers educators and academics The book then takes a largely age phase approach with a comparative analysis of selected education systems from around the world including the impact of globalisation Schooling, Society and Curriculum Alex Moore, 2006-08-10 Schooling Society and Curriculum offers a much needed reassessment and realignment of curriculum studies in the UK and international contexts Comprising a collection of eleven original chapters by prominent nationally and internationally known experts in the field of curriculum studies the book leads and fosters critical generic debates about formal education and its relationships to wider society Focusing on key debates that have been present for as long as formal state education has been in existence the contributors contextualise them within a future orientated perspective that takes particular account of issues specific to life in the early years of the twenty first century These include globalisation and nationalism poverty and wealth what it means to be a good citizen cultural pluralism and intolerance and centrally what it is that young people need from a school curriculum in order to develop as happy socially just adults in an uncertain and rapidly changing world The book is organized into four sections issues and contexts values and learners school curricula in the digital age exploring the possible globalisation localisation and utopias *The Art of Teaching Secondary English* Nicholas McGuinn, David Stevens, 2004-05-27 The Art of Teaching Secondary English is a practical and accessible resource for everyone involved in English teaching including teachers and student teachers of English Jacket Learner Centred Teaching : Philosophical, Historical, and Psychological Foundation Dr. Rajendra Kumar Shah, Learner centered teaching is the main topic of interest and discussion among

educators teachers professor and parents around the world Learner centered teaching is related to the curriculum at all levels of schools colleges and universities Therefore it is very important for all teachers parents curriculum experts etc to have knowledge about this concept But no one seems to have prepared a book about learner centered teaching in a simple language that everyone can understand Academicians such as Rousseau Froebel and Pestalozzi studied this concept in depth and made important contributions to broaden this concept In the same way in the 20th century many educationists gave great importance to learner centered teaching and researched it Educationists such as Dewey Kilpatrick Montessori Parkar played an important role in the development of progressive education His concept of democratic education is the basis for the development of learner centered teaching Similarly psychologists of different periods developed the concept of learner centered teaching Thus in today s world learner centered teaching has become a subject of interest and study for everyone The concept of learner centered teaching which has become the subject of everyone s interest and interest has been incorporated in this book that everyone can understand In this book the definition and concept of learner centered teaching has been presented with great effort On the other hand the major philosophical historical and psychological foundations of learner centered teaching have also been presented Therefore this book is believed to be able to fulfill many questions of the readers regarding the concept of learner centered teaching

Children, Education and Geography Lauren Hammond, Mary Biddulph, Simon Catling, John H. McKendrick, 2022-11-30 This book examines the intersections between children education and geography With a particular focus on children s geographies and geographies of education the book draws upon cutting edge research to consider how geographical education can be enhanced through increased engagement with these fields The book is underpinned by the position that the lives of children and young people are inherently geographical as are educational institutions systems and processes The volume explores the ways in which the diverse relationships between children education and geography can enrich research and work with and for children and young people Chapters in this book consider how injustices are reproduced through education Chapters also explore how insights generated by thinking in and across geography and education can be used to support and empower young people in both formal education and in their everyday lives Ultimately this book is written for children and young people Not as the readership but as people often marginalised in decision making at a variety of scales in education and who we contend should be at the heart of all educational thinking The book is of value to undergraduate and post graduate students interested in geography education and children s geographies as well as teachers of geography both new and experienced
