Beyond Reflective Practice Helen Bradbury, Nick Frost, Sue Kilminster, Miriam Zukas, 2012-09-11

Reflective practice has moved from the margins to the mainstream of professional education. However in this process its radical potential has been subsumed by individualistic rather than situated understandings of practice. Presenting critical perspectives that challenge the current paradigm this book aims to move beyond reflective practice. It proposes new conceptualisations and offers fresh approaches relevant across professions. Contributors include both academics and practitioners concerned with the training and development of professionals. Definitions of reflection which are often implicit often focus on the individual's internal thought processes and responsibility for their actions. The individual what they did thought felt is emphasised with little recognition of context power dynamics or ideological challenge. This book presents the work of practitioners educators academics and researchers who see this as problematic and are moving towards a more critical approach to reflective practice. With an overview from the editors and fourteen chapters considering new conceptualisations professional perspectives and new practices *Beyond Reflective Practice* examines what new forms of professional reflective practice are emerging. It examines in particular the relationships between reflective practitioners and those upon whom they practise. It looks at the ways in which the world of professional work has changed and the ways in which professional practice needs to change to meet the needs of this new world. It will be relevant for those concerned with initial and ongoing professional learning both in work and in educational contexts.

Becoming a Critically Reflective Teacher Stephen Brookfield, 1995-10-13

Building on the insights of his highly acclaimed earlier work *The Skillful Teacher* Stephen D Brookfield offers a very personal and accessible guide to how faculty at any level and across all disciplines can improve their teaching. Applying the principles of adult learning Brookfield thoughtfully guides teachers through the processes of becoming critically reflective about teaching confronting the contradictions involved in creating democratic classrooms and using critical reflection as a tool for ongoing personal and professional development. Using numerous examples Brookfield describes what critical reflection is and why it is so important. He tells how teachers can reframe their teaching by viewing their practice through four distinctive lenses: their autobiographies as teachers and learners, their students' eyes, their colleagues' perceptions and theoretical literature. He includes specific advice on using practical approaches to critical reflection such as teaching diaries, role model profiles, participant learning portfolios, structured critical conversation, the Critical Incident Classroom Questionnaire, the Good Practices Audit and more. He explains how the literature of educational research and philosophy can be used as an aid to rather than an inhibitor of critical

reflection And he discusses how to create a campus culture that supports critically reflective teaching
