Teaching At Risk Innercity Students:

Educational Resilience in inner-city America Margaret C Wang, Edmund W. Gordon, 2012-10-12 The story of life in inner city America and the education of its people is often recounted as a tragedy the ending is often predictable and usually dire highlighting deficiency failure and negative trends As with most social problems children and youth in the inner cities are hit hardest But this dismal view is only half of the full picture The cities of our nation are a startling juxtaposition between the despairing and the hopeful between disorganization and restorative potential Alongside the poverty and unemployment the street fights and drug deals are a wealth of cultural economic educational and social resources Often ignored are the resilience and the ability for adaptation which help many who are seemingly confined by circumstance to struggle and succeed in the face of the odds This book helps to broaden the utilization of ways to magnify the circumstances known to enhance development and education so that the burden of adversity is reduced and opportunities are advanced for all children and youth especially the children and youth of the inner cities who are in at risk circumstances The focus is on raising consciousness about the opportunities available to foster resilience among children families and communities and synthesizing the knowledge base that is central to implementing improvements which serve to better the circumstances and educational opportunities of children and families This volume is intended for a wide audience of readers but particularly those who are in a position to shape public policy and deliver educational and human services **Resources in Education**

the achievement of equity for all regardless of race gender or ethnicity is an ideal that is central to urban education The model also posits that effective urban education requires attention to the three central issues that confronts all education systems a accountability of individuals and the institutions in which they work b leadership which occurs in multiple ways and at multiple levels and c learning which is the raison d tre of education Just as a three legged stool would fall if any one leg were weak or missing each of these areas is essential to effective urban education and affects the others Minority Participation and Retention in Higher Education United States. Sweet, Judith I. Anderson, 2013-12-16 Through the years research on reading has made enormous contributions to helping us understand how students learn to read and how teachers can best instruct them Research continues to add to our fundamental knowledge of reading in significant ways thus adding more pieces to the puzzle for example finding answers to how students learn content in other school subjects through reading and what strategies teachers can use to help their students do this more effectively Reading Research into the Year 2000 describes the dynamic process that the Department of Education engages in to plan and execute a reading research agenda It was written to inform a wide ranging public those who will benefit directly or indirectly from reading research findings including those who use research applications as well as those who conduct the research Moreover it was written to make public the process of establishing a national R D Center Few people outside the Department of Education are aware of the procedures that are undertaken The editors believe that if more people are in the know they will be more likely to participate in the entire process from generating research ideas to submitting applications and that this greater participation is essential if we are to garner divergent thinking about how to solve critical education research issues They have made a significant step toward breaking down barriers to full participation and paved the way for greater involvement of non traditional players in competing for a national R D Center award
