Brody, Neil Davidson, 1998-07-10 Cooperative collaborative learning procedures increasingly attract great attention in school and higher education settings This book has two main purposes first to enable educators to make informed decisions and choices about selecting implementing and evaluating cooperative learning models with respect for the differences and diversity of goals among professionals in school communities and second to consider the goals of teachers professional development in the context of organizational reforms that foster systemic school change such as the development of learning communities The authors encourage professional development that goes beyond inservice workshops to include multi year development and support for teachers They advocate that schools be administered under collaborative principles so teachers can live the experience that they are trying to create in their own classrooms Professional Development for Cooperative Learning describes what works for professional development in cooperative learning and how difficult it is to bring about lasting change in school settings Brody and Davidson focus the dialogue on the nature of professional development linked to systemic changes and the successes failures and challenges encountered in the process
