Teaching As A Moral Craft By Tom Alan R:

The Teacher as Expert Robert Welker, 1992-01-01 At a time of increasing pressure for teachers to become more professional and more technically competent this book examines in a critical fashion whether teachers should be considered experts Written in straightforward and accessible prose Welker examines the concept of expertise through the ideas of notable educational thinkers in the twentieth century beginning with E P Cubberley and George S Counts and concluding with a chapter on critical theory and the ideas of Maxine Greene and Henry Giroux Other chapters examine such thinkers as Willard Waller Daniel Lortie Alan Tom Philip Jackson and Ivan Illich Each chapter establishes an historical and ideological context and evaluates how the social character of the expert matches the responsibilities While the idea of the teacher assuming the role of educational expert is gaining increased credibility in the current reform movement this book shows that the concept fails to describe the senses of moral and social competence required of the teacher Also the notion of the expert teacher might stand in the way of teachers forming the type of public partnerships necessary for them to complete their tasks adequately

Teaching Selves Jane Danielewicz, 2001-07-19 Through the experiences of six students who wish to become high school teachers this book explores the process of what it means to be a teacher and proposes ten principles for identity development

How to Succeed in School Without Really Learning David F. Labaree, 1997-01-01 David Labaree claims that by thinking of education primarily as the route to individual advancement we are defining it as a private good a means of gaining a competitive advantage over other people He endorses an alternative vision one that defines education as a public good providing society with benefits that can be collectively shared for example by producing citizens who are politically responsible and workers who are economically productive

Teacher Education: Curriculum and change David Hartley, Maurice Whitehead, 2006

Handbook of Research on Teacher Education Marilyn Cochran-Smith, Sharon Feiman-Nemser, John McIntyre, Kelly E. Demers, 2008-02-19 Co Published by Routledge Taylor Francis Group and the Association of Teacher Educators The Handbook of Research on Teacher Education was initiated to ferment change in education based on solid evidence The publication of the First Edition was a signal event in 1990 While the preparation of educators was then and continues to be the topic of substantial discussion there did not exist a codification of the best that was known at the time about teacher education Reflecting the needs of educators today the Third Edition takes a new approach to achieving the same purpose Beyond simply conceptualizing the broad landscape of teacher education and providing comprehensive reviews of the latest research for major domains of practice this edition stimulates a broad conversation about foundational issues brings multiple perspectives to bear provides new specificity to topics that have been undifferentiated in the past includes diverse voices in the conversation The Editors with an Advisory Board identified nine foundational issues and translated them into a set of focal questions What s the Point The Purposes of Teacher Education What Should Teachers Know Teacher Capacities Knowledge Beliefs Skills and Commitments Where Should Teachers Be

Taught Settings and Roles in Teacher Education Who Teaches Who Should Teach Teacher Recruitment Selection and Retention Does Difference Make a Difference Diversity and Teacher Education How Do People Learn to Teach Who's in Charge Authority in Teacher Education How Do We Know What We Know Research and Teacher Education What Good is Teacher Education The Place of Teacher Education in Teachers Education The Association of Teacher Educators ATE is an individual membership organization devoted solely to the improvement of teacher education both for school based and post secondary teacher educators For more information on our organization and publications please visit www.ate1.org

The Trouble with Ed Schools David F. Labaree, 2008-10-01 American schools of education get little respect They are portrayed as intellectual wastelands as impractical and irrelevant as the root cause of bad teaching and inadequate learning In this book a sociologist and historian of education examines the historical developments and contemporary factors that have resulted in the unenviable status of ed schools offering valuable insights into the problems of these beleaguered institutions David F Labaree explains how the poor reputation of the ed school has had important repercussions shaping the quality of its programs its recruitment and the public response to the knowledge it offers He notes the special problems faced by ed schools as they prepare teachers and produce research and researchers And he looks at the consequences of the ed school's attachment to educational progressivism Throughout these discussions Labaree maintains an ambivalent position about education schools admiring their dedication and critiquing their mediocrity their romantic rhetoric and their compliant attitudes

Redesigning Teacher Education Alan R. Tom, 1997-01-01 Explores the shortcomings of teacher education and proposes design principles for rethinking teacher preparation Establishes a reform agenda for teacher education faculties Alan Tom is among the best at relating important issues in teacher education and a critical reading of the literature with his own professional experience This book is ambitious It lives up to the claim of examining political and institutional problems along with conceptual and intellectual ones This is something few teacher educators attempt and is a critical area to open up for sustained analysis Drawing upon events from his career as a teacher educator Alan R Tom candidly analyzes the predominant criticisms of teacher education and rejects the common tendency to infer the teacher education curriculum from such ideas as metaphors for teaching or knowledge He proposes eleven design principles to serve as a reform agenda including creating programs capable of self renewal having faculty model the desired image and skills of teaching and rethinking the sequence of practice and theory Each principle identifies a differing dimension for the conceptual and structural redesign of teacher preparation Four specific change strategies are evaluated as well task force top down piloting and family style The low status of teacher educators and the excessive regulation of teacher education are also examined as is the failure to give adequate attention to the administrative organization for teacher education

The Teaching Career John Goodlad, Timothy McMannon, 2014-04-15 Featuring a group of expert contributors this book details the complexities of not only preparing teachers for the classroom but also helping them to succeed in the profession itself Addressing topics of

vital importance to new and veteran teachers this authoritative volume Explains how to build a strong sense of self to help teachers weather the inevitable storms they face in the field such as state mandates district directives and parental pressures Investigates highly regarded programs for new teachers analyzing orientations seminars and mentorship programs Discusses how to bring together stakeholders to renew teacher preparation induction and professional development Addresses the crucial role of teacher unions and how they are helping to make teaching a more attractive career And much much more Contributors Richard E Barnes Sheldon Berman Sharon Feiman Nemser Thomas Gillett John I Goodlad Paul E Heckman Daniel Katz Corinne Mantle Bromley Nancy Jean Sahling Roger Soder Adam Urbanski Patricia A Wasley Betty Lou Whitford Richard Wisniewski These thoughtful and provocative essays contribute to our understanding of ways to renew and sustain good teaching Anyone interested in matters of teacher induction professional development college school partnerships and the role of higher education in teacher development will find these essays a necessary read David G Imig President and CEO American Association of Colleges for Teacher Education John Goodlad and Timothy McMannon have captured many of the issues state board members are grappling with as they pursue the goal to have a highly qualified teacher in every classroom every day As states track and modify policies on program approval licensure recruitment and retention this work will help to inform their deliberations Brenda Welburn Executive Director National Association of State Boards of Education *Popular Culture, Educational Discourse, and Mathematics* Peter M. Appelbaum, 1995-04-26 This groundbreaking book analyzes contemporary education discourse in the light of curriculum politics and popular culture using sources ranging from academic scholarship to popular magazines music video film and television game shows Mathematics is used as an extreme case since it is a discipline so easily accepted as separable from politics ethics or the social construction of knowledge Appelbaum s juxtaposition of popular culture public debate and professional practice enables an examination of the production and mediation of common sense distinctions between school mathematics and the world outside of schools Terrain ordinarily displaced or excluded by traditional education literature becomes the pendulum for a new conversation which merges research and practice while discarding pre conceived categories of understanding The book also serves as an entertaining introduction to emerging theories in cultural studies progressively illustrating the uses of discourse analysis for comprehending ideology the implications of power knowledge links professional practice as a technology of power and curriculum as at once commodities and cultural resources In this way Appelbaum effectively reveals a direction for teachers students and researchers to cooperatively form a community attentive to the politics of curriculum and popular culture
