Teaching the Future Draper L. Kauffman, 1976 Teaching about the Future Barbara Miller, John D. Haas, Leslie Hendrikson, 1987 A study of the future for children youth and adults The topic is multidisciplinary in nature and congenial to many subjects in the curriculum

Teaching a Future President Zachary Herrmann, 2019-12-08 The purpose of this book is to articulate an aspirational vision for education one that deeply engages students in complex and meaningful work and prepares students for the personal social and societal problems and opportunities facing them and our society However simply adopting an aspirational vision for a high quality learning environment isn't the real challenge Most educators students and families don't need a lot of convincing that schools can and should do more Accordingly this book does not stop at simply articulating a vision of the possible the book also helps individuals visualize what it can look like and supports teachers families and other engaged community members as they work toward closing the gap between what is possible and what is currently realized

virtue and how it applies to consciousness education and the future Dr Lombardo emphasizes the one key virtue wisdom that provides the center of gravity around which all other character virtues revolve Indeed if any one concept unites the majority of essays in this collection it is wisdom In *The Wisdom of Future Consciousness* the author argues that wisdom is the highest expression of future consciousness and systematically describes the numerous connections between wisdom and heightened future consciousness Further according to the author wisdom is the key ideal that we should model and teach within education now and in the future This argument
