Technics And Time 1 The Fault Of Epimetheus Meridian:

Technics and Time, 1 Bernard Stiegler, 1998 What is a technical object At the beginning of Western philosophy Aristotle contrasted beings formed by nature which had within themselves a beginning of movement and rest and man made objects which did not have the source of their own production within themselves This book the first of three volumes revises the Aristotelian argument and develops an innovative assessment whereby the technical object can be seen as having an essential distinct temporality and dynamics of its own The Aristotelian concept persisted in one form or another until Marx who conceived of the possibility of an evolution of technics Lodged between mechanics and biology a technical entity became a complex of heterogeneous forces In a parallel development while industrialization was in the process of overthrowing the contemporary order of knowledge as well as contemporary social organization technology was acquiring a new place in philosophical questioning Philosophy was for the first time faced with a world in which technical expansion was so widespread that science was becoming more and more subject to the field of instrumentality with its ends determined by the imperatives of economic struggle or war and with its epistemic status changing accordingly The power that emerged from this new relation was unleashed in the course of the two world wars Working his way through the history of the Aristotelian assessment of technics the author engages the ideas of a wide range of thinkers Rousseau Husserl and Heidegger the paleo-ontologist Leroi Gourhan the anthropologists Vernant and Detienne the sociologists Weber and Habermas and the systems analysts Maturana and Varela *Globalization and Planetary Ethics* Simi Malhotra, Shraddha A. Singh, Zahra

Rizvi, 2023-08-25 This volume is a critical investigation into the contemporary phenomenon of the dissensus of the globe and the planet and the new terrains of consciousness that need to be negotiated towards a possibility for transformation It examines the possibilities of alternate sustainable modes of being and existing in a world which requires a unified ethical biopolitical worldview The book explores themes like philosophical posthumanism and planetary concerns disruption of cultural and intellectual inequality bodily movement through nomadic subjectivity dystopic spatialities of game re play globalization and speculative imaginaries of the body and theory of multiplicity It also discusses the impact of COVID 19 on human beings the role of the neoliberal media the question of rights of robots and cyborgs in sci fi movies and representation of refugees in literature This book will be of interest to scholars and researchers of English literature political philosophy cultural studies literary cultures post colonial studies critical theory and social anthropology *The Liberal Internet in the Postliberal Era* Johannes Thumfart, 2024-09-16 This book begins with an examination of the internet as a central institution of the post Cold War liberal order From this starting point Johannes Thumfart analyzes the contemporary rise of digital sovereignty in Asia and Europe alongside the establishment of private government within digital networks He interprets these phenomena as indications of an emerging postliberal era Thumfart engages with a wide array of empirical research and assesses liberal ideals such as state and net neutrality by discussing thinkers like Hegel Schmitt Mouffe Taylor Sandel

Fukuyama Anderson Jasanoff and Girard as well as network and rational choice theories He contends that the internet's reification of liberal values has paradoxically subverted these values and catalyzed the transition to postliberalism Thumfart suggests that instead of adhering to the traditional liberal focus on neutrality states should adopt the more flexible approach of neutralization to respond to the complexities of this digital and postliberal era

Chronophobia Pamela M. Lee, 2006-02-17 An examination of the pervasive anxiety about and fixation with time seen in 1960s art In the 1960s art fell out of time both artists and critics lost their temporal bearings in response to what E M Cioran called not being entitled to time This anxiety and uneasiness about time which Pamela Lee calls chronophobia cut across movements media and genres and was figured in works ranging from kinetic sculptures to Andy Warhol films Despite its pervasiveness the subject of time and 1960s art has gone largely unexamined in historical accounts of the period Chronophobia is the first critical attempt to define this obsession and analyze

it in relation to art and technology Lee discusses the chronophobia of art relative to the emergence of the Information Age in postwar culture The accompanying rapid technological transformations including the advent of computers and automation processes produced for many an acute sense of historical unknowing the seemingly accelerated pace of life began to outstrip any attempts to make sense of the present Lee sees the attitude of 1960s art to time as a historical prelude to our current fixation on time and speed within digital culture Reflecting upon the 1960s cultural anxiety about temporality she argues helps us historicize our current relation to technology and time After an introductory framing of terms Lee discusses such topics as presentness with respect to the interest in systems theory in 1960s art kinetic sculpture and new forms of global media the temporality of the body and the spatialization of the visual image in the paintings of Bridget Riley and the performance art of Carolee Schneemann Robert Smithson's interest in seriality and futurity considered in light of his reading of George Kubler's important work *The Shape of Time: Remarks on the History of Things* and Norbert Wiener's discussion of cybernetics and the endless belaboring of the present in sixties art as seen in Warhol's *Empire* and the work of On Kawara

Gendering Drugs Ericka Johnson, 2017-02-20 This book by bringing together critical pharmaceutical studies and feminist technoscience studies explores the way drugs produce sexed and/or gendered identities for those who take or resist them and how feminist technoscience studies can contribute a theoretical lens with which to observe sex and gender in the pharmaceuticalization processes Topics explored in this diverse collection include the use of hormones to delay puberty onset for trans children HPV vaccination against cervical cancer in Sweden the UK Austria and Colombia Alzheimer's discourses and the medication of prostate issues Ericka Johnson has brought together an innovative and timely collection that demonstrates gender as relevant in studies of pharmaceuticals and provides multiple examples of methodological and theoretical tools to consider gender while studying drugs

Musical Instruments in the 21st Century Till Bovermann, Alberto de Campo, Hauke Egermann, Sarah-Indriyati Hardjowirogo, Stefan Weinzierl, 2016-12-09 By exploring the many different types and forms of contemporary musical instruments this book contributes to a better understanding of the conditions of instrumentality in the 21st century Providing insights from science humanities and the arts authors from a wide range of disciplines discuss the following questions What are the conditions under which an object is recognized as a musical instrument What are the actions and procedures typically associated with musical instruments What kind of mental and physical knowledge do we access in order to recognize or use something as a musical instrument How is this knowledge being shaped by cultural conventions and temporal conditions How do algorithmic processes change the game of musical performance and as a result how do they affect notions of instrumentality How do we address the question of instrumental identity within an instrument's design process What properties can be used to differentiate successful and unsuccessful instruments Do these properties also contribute to the instrumentality of an object in general What does success mean within an artistic commercial technological or scientific context

Technomodern Poetics Todd F. Tietchen, 2018-10-01 After the

second World War the term technology came to signify both the anxieties of possible annihilation in a rapidly changing world and the exhilaration of accelerating cultural change Technomodern Poetics examines how some of the most well known writers of the era described the tensions between technical literary and media cultures at the dawn of the Digital Age Poets and writers such as Allen Ginsberg Charles Olson Jack Kerouac and Frank O Hara among others anthologized in Donald Allen's iconic The New American Poetry 1945 1960 provided a canon of work that has proven increasingly relevant to our technological present Elaborating on the theories of contemporaneous technologists such as Norbert Wiener Claude Shannon J C R Licklider and a host of noteworthy others these artists express the anxieties and avant garde impulses they wrestled with as they came to terms with a complex array of issues raised by the dawning of the nuclear age computer based automation and the expansive reach of electronic media As author Todd Tietchen reveals even as these writers were generating novel forms and concerns they often continued to question whether such technological changes were inherently progressive or destructive With an undeniable timeliness Tietchen's book is sure to appeal to courses in modern English literature and American studies as well as among fans of Beat writers and early Cold War culture Shreds of Matter Julius Greve, 2018-12-04 Shreds of Matter Cormac McCarthy and the Concept of Nature offers a nuanced and innovative take on McCarthy's ostensible localism and along with it the ecocentric perspective on the world that is assumed by most critics In opposing the standard interpretations of McCarthy's novels as critical either of persisting American ideologies such as manifest destiny and imperialism or of the ways in which humanity has laid waste to planet Earth Greve instead emphasizes the author's interest both in the history of science and in the mythographical developments of religious discourse Greve aims to counter traditional interpretations of McCarthy's work and at the same time acknowledge their partial truth taking into account the work of Friedrich W J Schelling and Lorenz Oken contemporary speculative realism and Bertrand Westphal's geocriticism Further newly discovered archival material sheds light on McCarthy's immersion in the metaphysical question par excellence What is nature **Revolutionary Stagecraft** Tarryn Li-Min Chun, 2024-06-04 Revolutionary Stagecraft draws on a rich corpus of literary historical and technical materials to reveal a deep entanglement among technological modernization political agendas and the performing arts in modern China This unique approach to Chinese theater history combines a close look at plays themselves performance practices technical theater details and behind the scenes debates over how to make theater amid the political upheavals of China's 20th century The book begins at a pivotal moment in the 1920s when Chinese theater artists began to import use and write about modern stage equipment and ends in the 1980s when China's scientific and technological boom began By examining iconic plays and performances from the perspective of the stage technologies involved Tarryn Li Min Chun provides a fresh perspective on their composition and staging The chapters include stories on the challenges of creating imitation neon rigging up a makeshift revolving stage and representing a nuclear bomb detonating onstage In thinking about theater through technicity the author mines well studied materials such

as dramatic texts and performance reviews for hidden technical details and brings to light a number of previously untapped sources such as technical journals and manuals set design renderings lighting plots and prop schematics and stage technology how to guides for amateur thespians This approach focuses on material stage technologies situating these objects equally in relation to their technical potential their human use and the social political economic and cultural forces that influence them In each of its case studies Revolutionary Stagecraft reveals the complex and at times surprising ways in which Chinese theater artists and technicians of the 20th century envisioned and enacted their own revolutions through the materiality of the theater apparatus

Technics And Time 1 The Fault Of Epimetheus Meridian: Bestsellers in 2023 The year 2023 has witnessed a remarkable surge in literary brilliance, with numerous captivating novels enthralling the hearts of readers worldwide. Lets delve into the realm of top-selling books, exploring the captivating narratives that have captivated audiences this year. Technics And Time 1 The Fault Of Epimetheus Meridian : Colleen Hoovers "It Ends with Us" This heartfelt tale of love, loss, and resilience has captivated readers with its raw and emotional exploration of domestic abuse. Hoover masterfully weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can triumph. Technics And Time 1 The Fault Of Epimetheus Meridian : Taylor Jenkins Reids "The Seven Husbands of Evelyn Hugo" This spellbinding historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reids compelling storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Discover the Magic : Delia Owens "Where the Crawdads Sing" This captivating coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens crafts a tale of resilience, survival, and the transformative power of nature, entrancing readers with its evocative prose and mesmerizing setting. These bestselling novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of engaging stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a exceptional and thrilling novel that will keep you guessing until the very end. The novel is a cautionary tale about the dangers of obsession and the power of evil.
