Close Encounters of the Third Kind Jon Towlson, 2016-09-06 For many Close Encounters of the Third Kind CE3K is not so much a movie as a religious experience On its release in 1977 CE3K virtually redefined the science fiction film shifting it away from spaceships laser guns and bug eyed monsters into a modified form of science fiction that John Wyndham once called logical fantasy What would it be like if extra terrestrials made contact with people on Earth How would it feel Like 2001 A Space Odyssey 1968 Steven Spielberg s primary inspiration CE3K is concerned with mankind s evolution towards the stars towards a state of transcendence But Spielberg s vision hinges not so much on cool scientific intellect being the key to our next stage of evolution as on the necessary development of emotional intelligence To that end we must regain our childlike curiosity for what lies beyond the skies we must recover our capacity to experience wonder Intensity of emotion is inherent to the film s meaning and the aim of this book is to explore this in detail Along the way it delves into the film s production history explores Spielberg s remarkable cinematic realisation of the film including a comparison study of the three different release versions and considers in detail how CE3K fits into the Spielberg oeuvre

Image and Geometry Processing for 3-D Cinematography Rémi Ronfard, Gabriel Taubin, 2010-06-29 papers illustrated with examples They include wavelet bases implicit functions defined on a space grid etc It appears that a common pattern is the recovery of a controllable model of the scene such that the resulting images can be edited interaction Changing the viewpoint is only one important aspect but changing the lighting and action is equally important 2 Recording and representing three dimensional scenes is an emerging technology made possible by the convergence of optics geometry and computer science with many applications in the movie industry and more generally in entertainment Note that the invention of cinema camera and projector was also primarily a scientific invention that evolved into an art form We suspect the same thing will probably happen with 3 D movies 3 Book Contents The book is composed of 12 chapters which elaborate on the content of talks given at the BANFF workshop The chapters are organized into three sections The first section presents an overview of the inter relations between the art of cinematography and the science of image and geometry processing the second section is devoted to recent developments in geometry and the third section is devoted to recent developments in image processing
