The Accentual Patterns Of The Slavic Languages:

The Accentual Patterns of Slavic Languages E. Stankiewicz, 1991 *The Accentual Patterns of the Slavic Languages* Edward Stankiewicz, 1993 Accent is one of the most vexing problems in Slavic linguistics and it has given rise to diverse schools of thought particularly in the area of historical reconstruction Based on almost three decades of research this monumental work is the first systematic description of the accentual patterns of all the Slavic languages with mobile stress Slovene Serbo Croatian Bulgarian Russian Ukrainian Byelorossian and Slovencian In addition it pursues two supplementary but by no means less significant goals to interpret the historical development of the accentual patterns and to make a typological comparison of their similarities and differences This book differs from previous studies of the accentuation of the individual Slavic languages in both method and scope Its consistent morphophonemic approach distinguishes automatic and nonautomatic alternations and emphasizes the role of the latter in the expression of Slavic grammatical categories and the various parts of speech Although the author's general approach is synchronic it does not diminish the importance of the historical comparative method but gives it additional strength by placing the historic interpretation of Slavic accentual patterns on a solid descriptive base Although Slavic accentology has been largely treated as an exemplar of historical reconstruction the results have been clouded by controversy and doubt This state of affairs is partly due to the scarcity of historical records but even more to the lack of systematic and exhaustive descriptions of the contemporary accentual patterns This book intends to fill that gap and to show to what extent these patterns continue to resemble one another in the midst of diversity and despite a long history of accentual change The historical sections and comments accompanying the synchronic descriptions are designed to trace the development of the accentual patterns from Common Slavic up to the modern period The author touches on the basic properties of the Common Slavic accentual system arguing that its overall design can be determined within the framework of Common Slavic rather than with reference to a Balto Slavic accentuation which is modeled on that of Lithuanian **BOOK JACKET** Title Summary field provided by Blackwell North America Inc All Rights Reserved **The Slavic Languages** Edward Stankiewicz, 2015-02-06 No detailed description available for The Slavic Languages **A Survey of Word Accentual Patterns in the Languages of the World** Harry van der Hulst, Rob Goedemans, Ellen van Zanten, 2010-12-15 In part I of this volume experts on various language areas provide surveys of word stress accent systems of as many languages in their part of the world as they could lay their hands on No preconditions theoretical or otherwise were set but the authors were encouraged to use the StressTyp data in their chapters Australian Languages Rob Goedemans Austronesian Languages Ellen van Zanten Ruben Stoel and Bert Remijsen Papuan Languages Ellen van Zanten and Philomena Dol North American Languages Keren Rice South American Languages Sergio Meira and Leo Wetzels African Languages Laura Downing European Languages Harry van der Hulst Asian Languages Harry van der Hulst and Ren Schiering Middle Eastern Languages Harry van der Hulst and Sam Hellmuth There is an introductory chapter

Chapter 1 that will provide the reader with elementary terminology and theoretical tools to understand the variety of accentual systems that will be discussed in the subsequent chapters of this book Chapter 2 has a double function It presents an overview of stress patterns in Australian languages but at the same time it is intended to re familiarize readers with the coding terminology and theoretical ideas of the StressTyp database Chapter 11 presents statistical and typological information from the StressTyp database Part II of this volume contains language profiles which are for each of the 511 languages contained in StressTyp in 2009 extracts from the information that is contained in the database This volume will be of interest to people in the field of theoretical phonology and language typology It will function as a reference work for these groups of researchers but also more generally for people working on syntax and other fields of linguistics who might wish to know certain basic facts about the distribution of word accent systems

Slavic Prosody Christina Y. Bethin,1998-07-13 In *Slavic Prosody* first published in 1998 Professor Bethin gives a coherent account of the Slavic languages at the time of their differentiation and relates these developments to issues in phonological theory First Professor Bethin argues that the syllable structure of Slavic changed before the fall of the jers and suggests that intrasyllabic and intersyllabic reorganization in Late Common Slavic was far more significant for Slavic prosody than the loss of weak jers She then makes a case for the existence of a bisyllabic prosodic domain in Late Common Slavic and trochaic metrical organization Finally she explores the implications of Slavic data for phonological theory discussing sonority skeletal structure the representation of length and prominence and language typology in some detail
