A Casebook of Ethical Challenges in Neuropsychology Shane S. Bush, 2004-11-23 The American Psychological Association published a revision of the Ethical Principles of Psychologists and Code of Conduct in 2002. This text, a companion to the 2002 text *Ethical Issues in Clinical Neuropsychology* by Bush and Drexler, presents the reader with common ethical challenges in neuropsychology. This text examines the differences between the 1992 and 2002 APA Ethics Codes as they relate to neuropsychological activities. The authors present cases and discuss ethical issues related to neuropsychological practice with a variety of patient populations and in a variety of clinical settings. In addition, ethical issues in neuropsychological research and test development are examined. The text also includes chapters on emerging and particularly challenging aspects of neuropsychological practice such as the assessment of response validity and the use of information technology and telecommunications. Through the use of case illustrations, the authors examine ethical issues in neuropsychology and the new Ethics Code, offering a practical approach for understanding and promoting ethical neuropsychological practice.

The Practice of American Public Policymaking Selden Biggs, Lelia B. Helms, 2014-12-18 Designed for upper level and professional courses, this text is a state-of-the-art introduction to the public policymaking process that gives equal attention to issues of policy implementation and public governance. It uses an innovative systems approach, integrating the activities, actors, tools, and techniques of policymaking to provide a comprehensive framework for policy design and analysis. The book is practice-oriented with a focus on the ways that policymakers at all levels employ the standard technologies of governance: authority, agency, program, rule, contract, and budget to design policy outputs and achieve policy outcomes. Through extensive use of graphics, the text makes concepts easy to grasp for a generation of students accustomed to the visual presentation of ideas. Case studies illustrate the tools and techniques discussed, and key terms, questions for discussion, and suggested readings round out each chapter.
