Corporate E-Learning Luther Tai, 2008 Corporate e learning has become increasingly important in the contemporary universal access business world and can provide strategic and competitive advantages to corporations as a way to accelerate training and reduce the high costs of face to face learning programs However most of the books that are written about e learning do not describe in detail how corporate e learning is actually implemented within a specific company Corporate E Learning fills that gap by describing in depth how e learning programs are developed and instituted and how their effectiveness is measured from the perspective of practicing e learning professionals at IBM an early and liberal user of e learning technologies to train their global workforce Drawing on a wealth of in person interviews of numerous e learning professionals at IBM as well as recent e learning literature Tai discusses how IBM has significantly contributed to the evolution of corporate e learning In the course of doing so he makes useful comparisons with other companies and industries and draws conclusions that are applicable to any company considering utilizing e learning Companies should be careful concludes Tai to use e learning only when it makes strategic and economic sense not simply because the technology is available In addition e learning should always be used along with other more traditional means of learning and carefully monitored by feedback mechanisms to measure whether its objectives have been accomplished and how e learning programs might improve in the future Corporate E Learning is designed for classroom use in technology management courses and will also appeal to corporate professionals who are involved in training human resources development and performance improvement *E-Learning, E-Education, and Online Training* Giovanni Vincenti, Alberto Bucciero, Carlos Vaz de Carvalho, 2014-12-01 This book constitutes the thoroughly refereed post conference proceedings of the First International Conference on E Learning E Education and Online Training eLEOT 2014 held in Bethesda MD USA in September 2014 The 22 revised full papers presented were carefully reviewed and selected from numerous submissions and focus topics such as web based tools augmented reality mobile learning teaching frameworks and platforms virtual learning environments
