Ferrarini,2002-03-28 28 authors discuss the current and future issues affecting investment conduct of business rules stock exchanges trading and company law Includes conflict of law issues on line trading clearing and settlement systems takeovers and relevant soft law *The Age of Immunology* A. David Napier,2010-12-15 In this fascinating and inventive work A David Napier argues that the central assumption of immunology that we survive through the recognition and elimination of non self has become a defining concept of the modern age Tracing this immunological understanding of self and other through an incredibly diverse array of venues from medical research to legal and military strategies and the electronic revolution Napier shows how this defensive way of looking at the world not only destroys diversity but also eliminates the possibility of truly engaging difference thereby impoverishing our culture and foreclosing tremendous opportunities for personal growth To illustrate these destructive consequences Napier likens the current craze for embracing diversity and the use of politically correct speech to a cultural potluck to which we each bring different dishes but at which no one can eat unless they abide by the same rules Similarly loaning money to developing nations serves as a tool both to make the peoples in those nations more like us and to maintain them in the nonthreatening status of distant dependents To break free of the resulting downward spiral of homogenization and self focus Napier suggests that we instead adopt a new defining concept based on embryology in which development and self growth take place through a process of incorporation and transformation In this effort he suggests that we have much to learn from non Western peoples such as the Balinese whose ritual practices require them to take on the considerable risk of injecting into their selves the potential dangers of otherness and in so doing ultimately strengthen themselves as well as their society *The Age of Immunology* with its combination of philosophy history and cultural inquiry will be seen as a manifesto for a new age and a new way of thinking about the world and our place in it **The Age of Charisma** Jeremy C. Young,2016-12-28 An innovative examination of American society culture and politics *The Age of Charisma* argues that the modern relationship between American leaders and followers grew out of a unique group of charismatic social movements prominent in the late nineteenth and early twentieth centuries Drawing on hundreds of letters and testimonials Jeremy C Young illustrates how personal magnetism in public speaking shaped society by enabling a shift from emotionally inaccessible leadership to emotionally available leadership This charismatic speaking style caused a rapid transformation in the leader follower relationship creating an emotional link between speakers and listeners and the effects of this social transformation remain with us today Young argues that ultimately charismatic movements enhanced American democracy by encouraging the personalization of leadership creating a culture in which today s leaders appeal directly to Americans through mass media **The Age of Agile** Stephen Denning,2018-02-08 An unstoppable business revolution is under way and it is Agile Sparking dramatic improvements in quality innovation and speed to market the Agile movement has helped companies learn to connect everyone and everything all the time With rapidly evolving consumer needs and
