Alfred North Whitehead

The Aims Of Education And Other Essays:

Aims of Education Alfred North Whitehead, 1967 Presents the texts of a series of lectures delivered between 1912 and 1928 on the purposes and practice of education **The Aims of Education and Other Essays** Alfred North Whitehead, 1953 **The Aims of Education and Other Essays, by A.N. Whitehead, ... [5th Impression.].** Alfred North Whitehead, 1947 **The Aims of Education & Other Essays** Alfred North Whitehead, 1929 Chapters I IV VI XIII IX and X have been published in my book *The organisation of thought* 1917 Chapter II published 1922 as a separate pamphlet Preface

The Aims of Education , 1954 **The Aims of Education** Roger Marples, 2012-10-12 Here international philosophers of education explore and question diverse strains of the liberal tradition discussing not only autonomy but other key issues such as social justice national identity curriculum critical thinking social practices The contributors write from a variety of standpoints offering many interpretations of what liberalism might mean in educational terms [The Aims of Education and Other Essays, by A. N. Whitehead, ... With a Foreword by Lord Lindsay of Birker, ... \[2nd Edition, 3rd Impression.\].](#) Alfred North Whitehead, Alexander Dunlop Lindsay Lindsay of Birker (Baron), 1955 **The Aims of Education and Other Essays** Alfred North Whitehead (Philosoph, Mathematiker, Grossbritannien, USA), 1942 **Alfred North Whitehead on Learning and Education** Franz G. Riffert, 2005 In this book a selection of 15 papers explores Whitehead's educational ideas which are based on his radical process approach Following the Introduction which presents Whitehead's criticism of traditional education and the false psychology which it is based on the book is divided into two major parts The first part deals with Whitehead's philosophically inspired alternative theoretical framework for learning and education Special focus is laid on the concept of the learning process which according to Whitehead is essentially cyclic in nature In the second part it is shown how Whitehead's ideas can profitably be applied to different sub domains within education management education college education and evaluation <http://www.cambridgescholarspress.com> [The Aims of Education, and Other Essays, Etc](#) Alfred North Whitehead, 1962 [Whitehead and Philosophy of Education](#) Malcolm D. Evans, 2021-10-25 That process philosophy can be the foundation of the theory and practice of educating human beings is the main argument of this book The process philosophy of Alfred North Whitehead 1861-1947 is the particular thinking on which this book is based Readers are shown that Whitehead's process philosophy provides a frame a conceptual matrix that addresses their concerns about education and offers direction for their educative acts Whitehead theorized that all living entities are connected in some way Relatedness connectedness and holism are recurring themes in this exploration of Whitehead's implied philosophy of education Whitehead never wrote a philosophy of education but his writings over a period of nearly thirty years reveal a persistent interest and concern with education His work ranging from *Introduction to Mathematics* 1911 to *Adventures of Ideas* 1938 is drawn on here to construct not Whitehead's philosophy of education but a Whiteheadian philosophy of education Whitehead and Philosophy of Education brings to scholars and students of education an understanding of Whitehead as an important

figure in philosophy particularly philosophy of education an acquaintance with process philosophy a brief treatment of Whitehead's life and an account of events and experiences that influenced his philosophizing and an exploration of the educationally salient concepts found in Whitehead's formal and informal philosophy with special attention to Whitehead's ideas about creativity process rhythm wisdom and knowledge Whitehead writes of phases of the rhythm of education romance precision and generalization The book is organized with attention to these three phases Part One Romance introduces readers to Whitehead the person and the change of context for educating from a mechanistic world view to an organismic one Part Two Precision examines Whitehead's writings as they relate to process philosophy and to educating Part Three Generalization is an application of the explorations of Parts One and Two yielding a construction of a Whiteheadian philosophy of education and suggestions for educational practice

Negotiating Toward Truth George David Miller, 2021-09-20 For far too many people for far too many years schooling has been a debilitating demoralizing and ultimately dehumanizing experience Make shift half hearted and watered down reform measures have proved ineffective Reform throws out the bath water but keeps the baby Radicalism recognizes not a baby but a beast lurks in the bath water and throws both out This dramatic redefinition of schooling examines four models of dynamism as provided by Nietzsche Whitehead Dewey and Freire Nietzsche's affirmation of dynamism is marred by his elitism Whitehead understands that inert cripple schooling Without dialogue ideas remain inert Dewey misunderstands thinking and does not grasp its inherent double movement toward order and disorder Freire's pedagogy is transcended with emphasis on negotiation between prime values The final chapter expounds a radical pedagogy of dynamism Miller argues that teaching and learning are not separate acts but form a continuum Within the teaching learning continuum all participants are spontaneous and receptive and seek to overcome fear of process ambiguity and doubt The key to radical schooling is a pro active stance toward creativity that allows for a dynamic integration of difference in dialogue *Negotiating Toward Truth* is a call to arms for all educators The book asks us to look closely what is in the bath water and to have the courage to throw the beast out with the bath water

Education from a Whiteheadian Point of View Vesselin Petrov, 2019-03-28 The basic aims of contemporary thinking in education are to cultivate a proper comprehension of the meaning and purpose of education and the role of the teacher and to develop adequate theoretical and methodological frameworks that combine some of the positive sides of the leading theories while avoiding their disadvantages Toward these ends one excellent candidate for consideration is Alfred North Whitehead's 1861-1947 process relational philosophy of education as set forth in *The Aims of Education* 1929 and elsewhere The contributors to this volume analyze Whitehead's philosophy of education in a detailed and critical fashion including inquiring into the development of cycle based approaches to education like Whitehead's in intellectual history as well as its potential objective bases They also demonstrate how this relates to and can be integrated with other leading theories of education and contemporary pedagogical thinking and identify avenues for its positive practical application in schooling

across the globe as well as in scientific research The book further critically evaluates current educational practices and the organization of educational institutions in this light and the effectiveness of teaching strategies that are founded upon some of its principles while also exploring the ramifications of its selection and application in education for society in general as well as for our common civilizational aspirations including humanity's addressing of global problems such as the ecological crisis In addition the volume also serves to lay some of the groundwork for its potential further development **Wonder**

and Education Anders Schinkel, 2020-11-12 Many people whether educators or not will agree that an education that does not inspire wonder is barren Wonder is commonly perceived as akin to curiosity as stimulating inquiry and as something that enhances pleasure in learning but there are many experiences of wonder that do not have an obvious place in education In *Wonder and Education* Anders Schinkel theorises a kind of wonder with less obvious yet fundamental educational importance which he calls contemplative wonder Contemplative wonder disrupts frameworks of understanding that are taken for granted and perceived as natural and draws our attention to the world behind our constructions sparking our interest in the world as something worth attending to for its own sake rather than for our purposes It opens up space for the consideration of radical alternatives wherever it occurs and in many cases is linked with deep experiences of value therefore it is not just important for education in general but also more specifically for moral and political education *The Aims of Education and Other*

Essays Alfred North Whitehead, 1962 *The Aims of Education and Others Essays* Alfred North Whitehead, 1964 *Digital and Media Literacy* Renee Hobbs, 2011-07-12 Leading authority on media literacy education shows secondary teachers how to incorporate media literacy into the curriculum teach 21st century skills and select meaningful texts *The Teaching American History Project* Rachel G. Ragland, Kelly A. Woestman, 2010-05-26 This collection of essays and research reports from participants in The Teaching American History Project provides models for historians teachers teacher educators and others interested in the teaching and learning of American History and presents examples of lessons learned from a cross section of TAH projects *The Peril and Promise of Performance Pay* Donald B. Gratz, 2009-04-16 This book provides an invaluable resource for school teachers administrators board members policy makers and citizens who would like to understand what's behind performance pay what might work and what will not and how to build a school improvement effort that includes teacher compensation as one of its strategies *Medicine: Preserving the Passion* Phil R. Manning, Lois DeBakey, 2013-03-14 In *Medicine Preserving the Passion* Phil R Manning a pioneer and recognized authority in continuing medical education and Lois DeBakey a passionate advocate of critical reasoning and leading scholar in scientific communication endeavor to shift the focus in lifelong learning from group exercises in a lecture hall to self directed practice related activities Although most experts have applauded this new concept few publications have addressed methods for implementation The Manning DeBakey book describes such methods as devised by outstanding clinicians and academicians to obtain educational benefit from their clinical experience Some techniques inspired by quality assurance for example these

master clinicians have used successfully to improve their knowledge skills and patient care This book not only identifies the primary concerns in continuing medical education but also offers sound recommendations and effective solutions and suggests future directions and approaches The authors have analyzed the continuing educational practices of physicians in a wide range of environments from small communities to the most acclaimed medical centers and have extracted additional advice from the writings of past authorities like Osler The resulting concepts will undoubtedly attract wide public attention Office practice audit self directed learning case indexing patient education computer assisted education and collegial networks as well as regular reading writing and teaching are among the successful methods described by physicians and surgeons who exemplify the highest standards of medical practice

Reviewing **The Aims Of Education And Other Essays**: Unlocking the Spellbinding Force of Linguistics
