Imaginations and Transmigrations in the Humanities Arts and TechnoSciences is a diverse collection of essays a recently
produced technology play by William Kennedy art and installations that represent and at times resist the ways science and
technology are interacting with the arts and the humanities to produce new imaginations and disciplinary transmigrations that
gesture towards a university of tomorrow As theorists posit new futures and call for an end to historically grounded or
discipline based so called silo approaches to knowledges a de facto reorganization of disciplinary boundaries and a migratory
spirit have spontaneously infused the humanities with new life These transmigrations instead of diffusing the disciplinary
terrain have strengthened and broadened existing fields They are provoking re mappings of intellectual topography and
ironically have brought about more rather than less integration Activated by such massive cultural shifts as the turn from
print to visual culture the technological revolution and its virtual sublimates the acceleration of scientific advances the rise and
incorporation of mass or popular culture and the possibilities of replication the humanities are producing integrated
knowledges what we are calling new TechKnowledgies that interface the humanities the arts the social and hard sciences
with digital technologies and research emerging at the borders of all these fields
