The Adolescent Passage Transitions From Child To Adult A Spectrum:

The Adolescent Passage Rainer Twiford, Peter Carson, 1980 **Children and Adolescents in Trauma** Chris Nicholson, Michael Irwin, Kedar Nath Dwivedi, 2010 Children and Adolescents in Trauma presents a variety of creative approaches to working with young people in residential children's homes, secure or psychiatric units and special schools and provides useful insights and a fresh perspective for anyone working with traumatised children and adolescents

Developmental Trajectories, Diagnosis, and Interventions for Autism Michael Vohr, 2025-08-20 This book introduces a developmental psychopathology approach to exploring the concept of autism in terms of three broad domains of development: physical, cognitive and psychosocial that are inextricably linked. Developmental psychopathology focuses on the interplay between normal and abnormal development. The juxtaposition of typical and atypical developmental patterns can better inform clinicians and parents of possible signs of achievement milestones that are missing or falling behind. This book consists of twelve chapters grouped under four parts with each chapter's core content based on the most recent research findings and ending with the author's reflections on various parts of the chapter and a summary of the main points discussed. A final chapter addresses topics of utmost importance rarely discussed in books on autism. Appropriate for a wide range of professionals who work with clients who have autism, this book is a unique resource with approaches often overlooked in most books on autism.

Family Therapy and the Autism Spectrum Marilyn J. Monteiro, 2016-01-29 The autism spectrum presents a range of communication, social and sensory differences that are challenging for clinicians to address. Family Therapy and the Autism Spectrum provides a guide to conceptualizing those differences and ways to discuss them with clients and their families. Readers are provided with narrative examples illustrating the application of key concepts introduced in the text. These case examples address issues that range across the life cycle from families with young children to ones with teens who are emerging as adults. Using the techniques learned in this book, clinicians will be able to guide families towards their positive autism narrative. This book also features a visual framework to organize the compelling narrative of each person's autism spectrum pattern of developmental differences or brain style. Using this visual framework and the corresponding descriptive language, clinicians and families can work together to create their autism conversations. The conversations lead to the transformative experiences of developing competencies, resiliency and advocacy for individuals and their families. The conversations also lead individuals with spectrum differences to use empowering language supporting their ability to develop self-advocacy and self-determination skills.
