Tortora,2015-02-26 Technology has been an essential factor in the production of dress and the cultures of fashion throughout human history Structured chronologically from prehistory to the present day this is the first broad study of the complex relationship between dress and technology Over the course of human history dress making and fashion technology has changed beyond recognition from needles and human hands in the ancient world to complex 20th century textile production machines it has now come to include the technologies that influence dress styles and the fashion industry while fashion itself may drive aspects of technology In the last century new technologies such as the electronic media and high tech manufacturing have helped not just to produce but to define fashion the creation of automobiles prompted a decline in long skirts for women while the beginnings of space travel caused people to radically rethink the function of dress In many ways technology has itself created avant garde and contemporary fashions Through an impressive range of international case studies the book challenges the perception that fashion is unique to western dress and outlines the many ways in which dress and technology intersect Dress Fashion and Technology is ideal reading for students and scholars of fashion studies textile history anthropology and cultural studies Encyclopedia of Information Science and Technology, Second Edition
