Fishes, Crayfishes, and Crabs: Commentary and English text Theodore W. Pietsch, 1995 First published in 1719 and exceptional in its day for its 460 brilliantly colored copper engravings Louis Renard s treatise on the marine life of the East Indies was dismissed in the 19th and 20th centuries because of its apparent embellishment exaggeration and even falsification Ichthyologist Theodore W Pietsch here reexamines this classic work and its almost surrealistic renderings and discovers a work of considerable scientific and historical interest In addition to its importance as one of the rarest natural history books known and one of the very few pre Linnaean works on marine organisms to be published in color Renard s book provides a description of the marine fauna of the East Indies that can be interpreted in light of modern scholarship In Fishes Crayfishes and Crabs Pietsch places Renard s original book fully in its historical and scientific context He supplies a facsimile of the original text a full translation with extensive historical

notes and 100 extraordinary color plates with their legends translated and annotated Pietsch also includes an examination of Renard's life and how he came to write his remarkable book along with a detailed taxonomic chart that identifies most of Renard's illustrated specimens
