The Age Of Uncertainty Points Of Departure:

Capitalist Rising A. J. Poitras, 2007 Many of the practices of modern capitalism were born during the six hundred years leading to the Industrial Revolution well before the assessments of Adam Smith and Karl Marx In his well written and informative study Poitras delves deep into the birth of capitalism bringing readers to the very verge of industrialism and a modern economy

The Age of Capitalism, Consumer Culture, and the Collapse of Nature in the Anthropocene Jack Thornburg, 2024-10-02 The Age of Capitalism Consumer Culture and the Collapse of Nature in the Anthropocene argues that the stability of post industrial postmodern society is threatened by the convergence of three distinct yet interrelated crises environmental degradation capitalist economic development and the primacy of consumption and self absorption as the basis for economic development at the expense of community and social relationships Jack Thornburg contrasts advanced modern society with indigenous cultures in terms of nature and conceptions of the communal self The complex nature of capitalist oriented society has influenced how individuals conceptualize themselves The outcome the author contends is a competitive society in which individuals are alienated living in uncertain times One consequence of these crises all of which derive from the Enlightenment and the concomitant appearance and evolution of capitalism has been the destruction of a worldview balancing and connecting well being with prosperity of the natural world Money and materialism cannot buy happiness as capitalist narrative asserts Thornburg claims that the happiness sought by individuals seeking meaning through consumption can only be realized by reintegrating nature with the human spirit

Qualitative Freedom - Autonomy in Cosmopolitan Responsibility Claus Dierksmeier, 2019-01-18 In the light of growing political and religious fundamentalism this open access book defends the idea of freedom as paramount for the attempt to find common ethical ground in the age of globality The book sets out to examine as yet unexhausted ways to boost the resilience of the principle of liberalism Critically reviewing the last 200 years of the philosophy of freedom it revises the principle of liberty in order to revive it It discusses many different aspects that fall under its three main topics the metaphysics of freedom quantitative freedom and qualitative freedom Open societies worldwide have come under increasing pressure in the last decades The belief that politics and markets fare best when guided by the principle of liberty presently faces multiple challenges such as terrorism climate warming inequality populism and financial crises In the view of its critics the idea of freedom no longer offers adequate guidance to meet these challenges and should be partially corrected or even entirely replaced by countervailing values Against the reduction of freedom to the merely quantitative question as to how much liberties individuals call their own this book draws attention to the qualitative concerns which and whose opportunities society should foster It argues that correctly understood the idea of liberty commits us to defend as well as advance the freedom of each and every world citizen

Jackson,2011 How can economists define and measure social preferences and interactions Through the use of new economic data and tools our contributors survey an array of social interactions and decisions that typify homo economicus Identifying economic strains in activities such as learning group formation discrimination and the creation of peer dynamics they demonstrate how they tease out social preferences from the influences of culture familial beliefs religion and other forces Advances our understanding about quantifying social interactions and the effects of culture Summarizes research on theoretical and applied economic analyses of social preferences Explores the recent willingness among economists to consider new arguments in the utility function *The Age of Central Banks* Curzio Giannini,2011 Curzio had one of the most fertile and original minds ever to be deployed on questions relating first to the interactions between Central Banks private sector financial intermediaries and the government and second to the working of the international monetary system in general and to the role of the IMF specifically within that His

approach has been to apply a theory of history which provides a beautifully written and illuminating book much easier and nicer to read and more rounded than the limited mathematical models that have so monopolised academia in recent decades. From the foreword by Charles A E Goodhart Curzio Giannini's history of the evolution of central banks illustrates how the most relevant institutional developments have taken place at times of widespread confidence crises and in response to deflationary pressures. The eminent and highly renowned author provides an analytical perspective to study the evolution of central banking as an endogenous response to crisis and to the ever increasing needs of economic growth. The key argument of the analysis is that crucial innovations in the payment technology from the invention of coinage to the development of electronic money could not have taken place without an institution i.e. the central bank that could preserve confidence in the instruments used as money. According to Curzio Giannini's neo-institutionalist methodological approach, social institutions are in fact essential in the coordination of individual decisions as they minimize transaction costs, overcome information asymmetries and deal with incomplete contracts. This enlightening and revealing historical theory perspective on central banking will prove a thought provoking read for academic and institutional economists, economic historians and economic policymakers involved in the task of crafting a new institutional arrangement for central banking in the globalized economy.

Handbook of Social Economics Jess Benhabib, Alberto Bisin, Matthew O. Jackson, 2010-11-12. How can economists define and measure social preferences and interactions? Through the use of new economic data and tools, our contributors survey an array of social interactions and decisions that typify homo economicus. Identifying economic strains in activities such as learning, group formation, discrimination and the creation of peer dynamics, they demonstrate how they tease out social preferences from the influences of culture, familial beliefs, religion and other forces. Advances our understanding about quantifying social interactions and the effects of culture. Summarizes research on theoretical and applied economic analyses of social preferences. Explores the recent willingness among economists to consider new arguments in the utility function. Matthew O Jackson has contributed to Handbooks in Economics: Social Economics. Set as an editor. Matthew O Jackson is the William D Eberle Professor of Economics at Stanford University. Places and Politics in an Age of Globalization Roxann Prazniak, Arif Dirlik, 2001-02-07. This ambitious work provides a unique statement on the question of place-based activism and its relationship to powerful forces of international capital. Arguing that specific places around the world are sites for the defense and enhancement of daily life in the context of rapidly expanding global technologies and investment options, the contributors reach for a vision of social development that supports sustainable humane cultures. Bringing together the local and the global, this work provides the first sustained linkage of ethnic groups in diaspora to macrocosmic processes of world capital that inevitably reach down to mediate even the most local experiences. The essays, ranging in their discussion of place from Los Angeles and New York to New Zealand and Indonesia, offer both reasoned argument and authoritative information on how local experience interacts with larger processes of global capital and the diasporic phenomenon. The book will be an

invaluable resource and launching point for scholars and students in ethnic and identity studies and will interest all readers exploring the production of place and identification

Copyright and Patent Laws for the Age of Artificial Intelligence
Eva Janecková, 2025-05-15 This book responds to the need to distinguish human creations from those produced by AI It does so by tracing human attributes of authorship and inventorship in statutory requirements for protection and ownership in European copyright and patent laws Its main contribution lies in exposing shortcomings in how the laws are applied in the UK Germany and France It shows that the human origin of creations is traditionally inferred from their expressive form or technical character Given the advancements in AI such inferences are no longer legitimate What is more these shortcomings may eventually lead to granting copyright or patent protection where none is lawfully permitted or sufficiently justified To remedy the situation this book offers doctrinal and conceptual amendments and proposes law reforms to implement them This book guides authorities practitioners and students through the main arguments of the debate concerning copyright and patents for objects entirely or partly generated by AI It also makes original contributions to advance the ongoing academic and policy debates on AI and intellectual property law

The Iron Age, 1894 *Sculpture in the Age of Doubt* Thomas McEvelley, 1999-08 Framed in a lucid discussion of the intellectual issues surrounding the postmodern movement the essays in this book re examine the course of twentieth century art through the work of twenty five major sculptors McEvelley masterfully traces the evolution of modern sculpture from the readymades of Marcel Duchamp to the anti painting statements of the 1960s to the spiritualism and conceptualism of the 1980s and 1990s This is a groundbreaking work in the field of art criticism and a fundamental text for anyone interested in the history of current art and culture Allworth Press an imprint of Skyhorse Publishing publishes a broad range of books on the visual and performing arts with emphasis on the business of art Our titles cover subjects such as graphic design theater branding fine art photography interior design writing acting film how to start careers business and legal forms business practices and more While we don't aspire to publish a New York Times bestseller or a national bestseller we are deeply committed to quality books that help creative professionals succeed and thrive We often publish in areas overlooked by other publishers and welcome the author whose expertise can help our audience of readers
