## **The Alchemical Elements And Principles:**

*The Journal of the Alchemical Society*, 1913      *The Alchemical Essence and the Chemical Element* Matthew Moncrieff Pattison Muir, 1894      *Elements, Principles and Corpuscles* Antonio Clericuzio, 2013-04-17 In *Elements Principles and Particles* Antonio Clericuzio explores the relationships between chemistry and corpuscular philosophy in the age of the Scientific Revolution Science historians have regarded chemistry and corpuscular philosophy as two distinct traditions Clericuzio's view is that since the beginning of the 17th century atomism and chemistry were strictly connected This is attested by Daniel Sennert and by many hitherto little known French and English natural philosophers They often combined a corpuscular theory of matter with Paracelsian chemical and medical doctrines Boyle plays a central part in the present book Clericuzio redefines Boyle's chemical views by showing that Boyle did not subordinate chemistry to the principles of mechanical philosophy When Boyle explained chemical phenomena he had recourse to corpuscles endowed with chemical not mechanical properties The combination of chemistry and corpuscular philosophy was adopted by a number of chemists active in the last decades of the 17th century both in England and on the Continent Using a large number of primary sources the author challenges the standard view of the corpuscular theory of matter as identical with the mechanical philosophy He points out that different versions of the corpuscular philosophy flourished in the 17th century Most of them were not based on the mechanical theory i.e. on the view that matter is inert and has only mechanical properties Throughout the 17th century active principles as well as chemical properties are attributed to corpuscles Given its broad coverage the book is a significant contribution to both history of science and history of philosophy      **The Story of Alchemy and the Beginnings of**

**Chemistry** M. M. Pattison Muir, For thousands of years before men had any accurate and exact knowledge of the changes of material things they had thought about these changes regarded them as revelations of spiritual truths built on them theories of things in heaven and earth and a good many things in neither and used them in manufactures arts and handicrafts especially in one very curious manufacture wherein not the thousandth fragment of a grain of the finished article was ever produced The accurate and systematic study of the changes which material things undergo is called chemistry we may perhaps describe alchemy as the superficial and what may be called subjective examination of these changes and the speculative systems and imaginary arts and manufactures founded on that examination We are assured by many old writers that Adam was the first alchemist and we are told by one of the initiated that Adam was created on the sixth day being the 15th of March of the first year of the world certainly alchemy had a long life for chemistry did not begin until about the middle of the 18th century      **The Alchemical Essence and the Chemical Element** Muir, 1894      **The Story of**
