Why Ireland Starved Joel Mokyr,2013-11-05 Technical changes in the first half of the nineteenth century led to unprecedented economic growth and capital formation throughout Western Europe and yet Ireland hardly participated in this process at all While the Northern Atlantic Economy prospered the Great Irish Famine of 1845 50 killed a million and a half people and caused hundreds of thousands to flee the country Why the Irish economy failed to grow and why Ireland starved remains an unresolved riddle of economic history Professor Mokyr maintains that the Hungry Forties were caused by the overall underdevelopment of the economy during the decades which preceded the famine In *Why Ireland Starved* he tests various hypotheses that have been put forward to account for this backwardness He dismisses widespread arguments that Irish poverty can be explained in terms of over population an evil land system or malicious exploitation by the British Instead he argues that the causes have to be sought in the low productivity of labor and the insufficient formation of physical capital results of the peculiar political and social structure of Ireland continuous conflicts between landlords and tenants and the rigidity of Irish economic institutions Mokyr's methodology is rigorous and quantitative in the tradition of the New Economic History It sets out to test hypotheses about the causal connections between economic and non economic phenomena Irish history is often heavily coloured by political convictions of Dutch Jewish origin trained in Israel and working in the United States Mokyr brings to this controversial field not only wide research experience but also impartiality and scientific objectivity The book is primarily aimed at numerate economic historians historical demographers economists specializing in agricultural economics and economic development and specialists in Irish and British nineteenth century history The text is nonetheless free of technical jargon with the more complex material relegated to appendixes Mokyr's line of reasoning is transparent and has been easily accessible and useful to readers without graduate training in economic theory and econometrics since its first publication in 1983 **Report** Nebraska Potato Improvement Association,1926
