SMP 11-16 Teacher's Guide to Book B1 School Mathematics Project,1985 SMP 11 16 is a mathematics resource for secondary schools which emphasises the relationship between mathematics and the world around us The course material falls into two parts Part 1 covering the first two years consists mainly but not exclusively of booklets arranged into strands which enable pupils to work at their own pace Part 2 covering Years 9 10 and 11 consists principally of five series of books designed to suit pupils of different attainment Y yellow R red B blue G green and A amber **The Sociology of**

Mathematics Education Paul Dowling,2002-11-01 Until the 1960s maths was studied as an academic subject in a desire to have more mathematicians The current trend however has moved away from viewing maths as a purely intellectual endeavour and towards developing a more mathematically competent workforce and citizenry This trend has seen a large increase in the number of maths schemes being produced by the major educational publishers which attempt to make maths easier and more approachable by using language instead of symbols So why do so many children still fail at maths The author contends that to understand this teachers need to analyze and evaluate the maths textbooks they are currently using The author shows the reader how to systematically analyze and evaluate these textbooks This interrogation of classroom resources should have important implications for teaching strategies and for textbook design and use **SMP 11-16**
