To produce a good balance staff requires more skill than to produce any other
turned portion of a watch and your success will depend not alone on your knowledge of its proper shape and measurements
nor the tools at your command but rather upon your skill with the graver and your success in hardening and tempering There
are many points worthy of consideration in the making of a balance staff that are too often neglected I have seen staffs that
were models as regards execution and finish that were nearly worthless from a practical standpoint simply because the
maker had devoted all his time and energy to the execution of a beautiful piece of lathe work and had given no thought or
study to the form and size of the pivots On the other hand one often sees staffs whose pivots are faultless in shape but the
execution and finish so bungling as to offset all the good qualities as regards shape To have good tools and the right ideas is
