Staffing Higher Education Maurice Kogan, 1994 Staffing Higher Education Maurice Kogan, Ingrid Moses, Elaine El-Khawas, 1994 **International Handbook of Higher Education** James J.F. Forest, Philip G. Altbach, 2008-01-18 This book provides a central authoritative source of reference on the most essential topics of higher education The International Handbook of Higher Education combines a rich diversity of scholarly perspectives with a wide range of internationally derived descriptions and analyses Chapters in the first volume cover central themes in the study of higher education while contributors to the second volume focuses on contemporary higher education issues within specific countries or regions Together these volumes provide a centralized easily accessible yet scholarly source of information EBOOK: Towards Strategic Staff Development in Higher Education Richard Blackwell, Paul Blackmore, 2003-07-16 This book focuses on strategic staff development in higher education a sector in which it has been largely viewed as an operational activity with little organizational relevance The book demonstrates how staff development needs to be based on modern theories of organizational learning aligning itself with institutional and departmental needs as well as the wants and needs of individual staff The book takes a broad definition of staff development and seeks to cover all aspects of the academic role and the interests of all staff The traditional focus on teaching and learning is covered but not to the exclusion of other aspects or the interface between different roles In order to achieve a strategic focus authors are drawn from a range of backgrounds including senior staff with strategic leadership roles The book is therefore directed to a wider readership than the community of staff development professionals and designed partly to challenge the dominant discourse and established priorities of staff developers Towards Strategic Staff Development in Higher Education seeks to combine scholarly review of relevant literature with practical strategies and suggestions for the intended readership principally senior staff heads of department and staff development professionals Universities and Their Leadership William G. From the Eye of the Storm B.W. Jongbloed, P.A. Maassen, G. Neave, 2013-03-14 In order to celebrate the fifteenth anniversary the third lustrum of our Center we at CHEPS decided to collectively write a book on the issue of how higher education institutions deal with the demand for change Institutional change is without any doubt one of the burning issues for researchers in higher education and policy studies in general but even more so for administrators at the institutional level institutional leadership deans and planners of higher education in public life government agencies intermediary organisations international organisations Whereas the lustrumbook we wrote for our second lustrum concentrated on comparative policy studies many of them focusing on comparisons between different national higher education systems this time the object of our analyses is the institution itself Today's higher education institutions are faced by demands from a multitude of actors from inside the institution students staff as well as from the institution's environment governments employers research councils sponsors These demands require changes in policy practice systems and culture The ways in which institutions respond to these demands and how their behaviour may be understood and predicted is the challenge tackled by the authors of this volume each from their own perspective and each looking at different aspects of the educational organisation

Universities in Crisis Eric Lybeck, Catherine O'Connell, 2023-01-26 This book goes beyond now familiar analyses of neoliberal governmentality which tend to characterise academics as passive subjects or as strategic actors drawing on and cynically exploiting metrics as a form of capital exchangeable across different fields Instead Universities in Crisis draws on newer paradigms by drawing on processual post critical and phenomenological approaches that leave room for new spaces of negotiation discursive and practical for understanding and advancing academic professionalism in this rapidly changing context Contributors reflect various manifestations of the changing political and public climate as well as the unease that surrounds contemporary debates which position the academy in troubling ways Unifying concepts such as academic work jurisdiction and transdisciplinarity are deployed to transcend functional divisions

within and between academics administrators managers and students Drawing on these theoretical and conceptual resources contributors engage in critical consideration of whether the potential for push back lies both in re emphasising the specialness of academic professionalism and in defining the commonalities with other professional groups of knowledge workers The book offers an unflinching analysis on the conditions which frame the darker side of professionalism and which are associated with increased precarity and reduced autonomy The contributors explore the dilemmas challenges and possibilities of professionalism for both early career academics and senior academic leaders

on every possible topic they are in general reluctant to examine their own social institution Within the European context Ulrich Teichler is one of the main exceptions to this rule Already in his student days he has recognised the unique characteristics of higher education institutions and systems and he understood that special efforts are needed to improve our knowledge on higher education **Towards the Virtuous University** Jon Nixon, 2008-05-13 Written for higher education academics staff developers policy makers and leaders this book aims to tackle a subject that is at the heart of higher education today the nature of a good university
