## **Staircases Detail In Building:**

**Techniques of Staircase Construction** W. Mannes, 2012-12-06 Staircases which today are equally the responsibility of joiners The increasing demand for textbooks on the techniques of stair and carpenters have had a varied history over the last thirty construction is due to two main factors years Until 1945 nearly all staircases even those in large residential blocks were made of wood Because of the amount of 1 The relatively small dwellings that were built twenty to thirty destruction that took place during the war new building regulations years ago are no longer regarded as acceptable New regulations frequently stipulated nonflammable materials for almost all dwellings concerning noise and heat insulation as well as government aid available to finance such projects have in addition This resulted in a decline in the quality of stair construction condition stimulated the rebuilding and thus the design of more what is more fewer and fewer craftsmen were trained for this generously proportioned dwellings including of course rewarding and varied branch of woodworking craftsmanship staircases This is a regrettable development since good stair builders must combine the design capabilities and three dimensional approach 2 The style of living has changed The time when sober interior of the carpenter with the exact and neat craftsmanship of the joiners were the order of the day has gone Excessive nostalgic Techniques of Staircase Construction therefore provides welcome reversal to previous styles has also passed

**Staircases** Karl J. Habermann, 2003 Despite the ever widening range of ready made components on the market an expertly made staircase aptly fitting the building is still a hallmark of good architecture and reveals much about an architect's approach to design construction and materials This volume reviews the current state of technology in stair construction providing a comprehensive overview of the latest production methods useful for the day to day work Following an introductory essay on the development of staircases the fundamental principles in building stairs are documented and essential information is provided on the crucial elements of construction and the creative possibilities of the basic materials wood steel and concrete The theory is illustrated by a large number of extensively documented international examples providing an invaluable source of inspiration for builders and architects As a practical aid the book contains a subject index glossary and information on current regulations and norms

*Staircases* Michael Spens, 1995 The new Detail in Building series provides a foundation of contemporary design data covering key elements of building design Such essential elements are part of the vocabulary of contemporary architecture and future titles in the series will include canopies parapets entrance doors rooflights and windows Each building element will be clearly analysed both historically and in terms of contemporary examples by leading practices around the world The combination of building context design aesthetics and technical solution as revealed in the case studies will be highly informative as well as unique in a field where specific technical quality in design detailing is often underexposed by the superficial presentation of entire schemes Launching this new series Staircases examines ten key stair designs that are both excellent in composition and successful in use Introducing the case studies is a fully illustrated history of the staircase from its origins through the

Renaissance and eighteenth and nineteenth centuries to the remarkable virtuosity displayed by twentieth century designers The book includes work by Sir Norman Foster Herman Hertzberger Will Alsop Eva Jiricna and Richard Meier Each example is analysed through detailed drawings and photographs and the solution examined in full context The result will be inspirational to students and designers alike proving an invaluable tool in design Details of Building Construction Clarence Augustine Martin,1908 **Architectural Building Construction** W.
