Perspectives on Stalking Roland D. Maiuro, 2015-11-13 Each year an estimated 3 4 million men and women become victims of stalking While a man in a black coat following a girl in a dark alley is the media's stereotypical portrayal of stalking there is actually a wide range of behavior that can be defined as such Stalking characterized by harassment repeated calling sending inappropriate letters or gifts unsuitable use of social media confrontation and other unwanted behaviors is a worldwide problem that is on the rise especially the incidence and prevalence of cyberstalking This book presents a collection of prominent articles published in the peer reviewed journal Violence and Victims written by experts on stalking from a variety of social science disciplines Authors present research related to stalking victims and perpetrators cyberstalking how to identify stalking and stalking in a variety of settings with a focus on college campuses College students many of whom are relatively new to intimate relationships are especially prone to becoming stalked or perpetrating stalking Several articles in this collection address stalking within the college population including an empirical study of stalking victimization in men and women and a discussion of coping strategies at a Finnish university Authors examine varying perceptions and attitudes toward stalking on campus and discuss how to draw the line between courtship behavior and stalking Personality attributes of stalkers include according to one study less social competence and a greater tendency to display borderline behaviors Studies also address the relationship between stalking and gender the stalking experiences of battered women and the growing incidence of

cyberstalking This book will provide a solid research foundation toward understanding and controlling stalking behaviors which can potentially lead to more serious abuse Key Features Disseminates the most acclaimed research articles on stalking from the peer reviewed journal Victims and Violence Authored by well known stalking experts from varied social science disciplines Explores stalking in numerous settings including college campuses Presents research on perpetrators and victims of stalking Examines cyberstalking Handbook on Crime Fiona Brookman, Mike Maguire, Harriet Pierpoint, Trevor Bennett, 2010-02-01 The Handbook on Crime is a comprehensive edited volume that contains analysis and explanation of the nature extent patterns and causes of over 40 different forms of crime in each case drawing attention to key contemporary debates and social and criminal justice responses to them It also challenges many popular and official conceptions of crime This book is one of the few criminological texts that takes as its starting point a range of specific types of criminal activity It addresses not only conventional offences such as shoplifting burglary robbery and vehicle crime but many other forms of criminal behaviour often an amalgamation of different legal offences which attract contemporary media public and policy concern These include crimes committed not only by individuals but by organised criminal groups corporations and governments There are chapters on for example gang violence hate crime elder abuse animal abuse cyber crime identity theft money laundering eco crimes drug trafficking human trafficking genocide and global terrorism Many of these topics receive surprisingly little attention in the criminological literature The Handbook on Crime will be a unique text of lasting value to students researchers academics practitioners policy makers journalists and all others involved in understanding and preventing criminal behaviour *Acts of Violence in the School Setting* Kimberly A. McCabe, 2020-01-08 Since the year 2000 there have been approximately 200 school shootings in the United States Unfortunately this is not simply a U S problem In 2017 a 15 year old Canadian male student committed suicide after shooting two other students and a teacher During that same year in Brazil a private school student fatally shot two classmates and injured four In 2018 a 13 year old Russian girl opened fire with a gas pistol and injured seven 7th graders Hence school violence is a problem of global concern Acts of School Violence in the School Setting addresses this international problem from a crime and criminal justice perspective The history of school violence follows the pattern of what most would consider the history of education According to the U S Department of Justice current research has shown a decline in the rates of school violence over the past three years however the few high profile cases broadcast repeatedly in the media lead the public to other conclusions All individuals agree that a child attending school should be concerned with the process of learning not with avoiding victimization and that the school environment should be a safe and secure location for both students and teachers In addition and most central to this text without a safe school environment students and teachers may be assaulted injured or killed Included in this textbook are definitions related to the types and categories of school violence including bullying stalking and crimes against students that involve the internet discussions on victims and offenders and case examples Also included in this textbook is information on

criminal justice system responses to school violence from both a national and international perspective Finally this textbook discusses adult perpetrators of school violence and the explanations for such attacks
