Brian Miller,Richard P. Reading,2000-09-30 Explore the multiple issues that surround species declines and conservation efforts through the only reference source to examine the conflicting conservation issues of 49 endangered species While the causes of endangerment are relatively easy to understand the ultimate or underlying factors are often far more complex and difficult to address An introduction to these issues and how to resolve them is provided in this unique collection of case

studies of animal species that have been pushed to the brink of extinction Each case study provides the following information
Common name Scientific name Order Family Status Threats Habitat Distribution Natural history Conflicting Issues Future
and Prognosis Conservationists are increasingly recognizing that the ultimate causes of extinction are primarily socio
economic and political yet biological approaches to recovery continue to dominate More inclusive interdisciplinary
conservation programs are explored here to offer better prospects for managing problems and conflicts In addition to the
case studies trends and common themes are explored to provide a comprehensive interdisciplinary approach to conservation
Students and teachers can explore a wide variety of endangered species programs and the conflicting issues common to
recovery efforts which will enable them to evaluate conservation practice and to draw their own conclusions for improvement
