Privacy and Data Protection Issues of Biometric Applications Els J. Kindt, 2013-12-05 This book discusses all critical privacy and data protection aspects of biometric systems from a legal perspective. It contains a systematic and complete analysis of the many issues raised by these systems based on examples worldwide and provides several recommendations for a transnational regulatory framework. An appropriate legal framework is in most countries not yet in place. Biometric systems use facial images, fingerprints, iris and/or voice in an automated way to identify or to verify identity claims of persons. The treatise, which has an interdisciplinary approach, starts with explaining the functioning of biometric systems in general terms for non-specialists. It continues with a description of the legal nature of biometric data and makes a comparison with DNA and biological material and the regulation thereof. After describing the risks, the work further reviews the opinions of data protection authorities in relation to biometric systems and current and future EU law. A detailed legal comparative analysis is made of the situation in Belgium, France and the Netherlands. The author concludes with an evaluation of the proportionality principle and the application of data protection law to biometric data processing operations, mainly in the private sector. Pleading for more safeguards in legislation, the author makes several suggestions for a regulatory framework aiming at reducing the risks of biometric systems. They include limitations to the collection and storage of biometric data as well as technical measures which could influence the proportionality of the processing. The text is supported by several figures and tables providing a summary of particular points of the discussion. The book also uses the 2012 biometric vocabulary adopted by ISO and contains an extensive bibliography and literature sources.

Trends in Applied Intelligent Systems Nicolás García-Pedrajas, Francisco Herrera, Colin Fyfe, José Manuel Benítez Sánchez, Moonis Ali, 2010-05-20 The three volume set LNAI 6096, LNAI 6097 and LNAI 6098 constitutes the thoroughly refereed conference proceedings of the 23rd International Conference on Industrial Engineering and Other Applications of Applied Intelligent Systems (IEA/AIE 2010) held in Cordoba, Spain, in June 2010. The total of 119 papers selected for the proceedings were carefully reviewed and selected from 297 submissions. The contributions highlight new trends and frontiers of applied artificial intelligence and show how new research could lead to new and innovative applications.

Modern Administrative Law in the 21st Century Md. Awal Hossain Mollah, 2024-10-02 Drawing on over two decades of teaching experience in Administrative Law, the author has strived to encapsulate the pivotal role this field plays in shaping governmental operations and safeguarding individual rights. The book transcends traditional boundaries by offering a comparative perspective on administrative law. It delves into how diverse legal traditions and institutional frameworks address common governance challenges and opportunities, highlighting the global interconnectedness of governance systems. Administrative law is both a guardian and architect of governmental actions, ensuring accountability, transparency, and justice.

With rapid transformations driven by technological advancements globalization and evolving societal expectations the study of administrative law has become increasingly crucial This comprehensive book explores the multifaceted dimensions of contemporary administrative law providing profound insights into its principles practices and challenges It serves as a practical guide for policymakers legal practitioners academics and students navigating the complexities of administrative law and digital governance

Facts in Public Law Adjudication Joe Tomlinson, Anne Carter, 2023-10-19 This book explores critical issues about how courts engage with questions of fact in public law adjudication Although the topic of judicial review the mechanism through which individuals can challenge governmental action continues to generate sustained interest amongst constitutional and administrative lawyers there has been little attention given to questions of fact This is so despite such determinations of fact often being hugely important to the outcomes and impacts of public law adjudication The book brings together scholars from across the common law world to identify and explore contested issues common challenges and gaps in understanding The various chapters consider where facts arise in constitutional and administrative law proceedings the role of the courts and the types of evidence that might assist courts in determining legal issues that are underpinned by complex and contested social or policy questions The book also considers whether the existing laws and practices surrounding evidence are sufficient and how other disciplines might assist the courts The book reconnects the key practical issues surrounding evidence and facts with the lively academic debate on judicial review in the common law world it therefore contributes to an emerging area of scholarly debate and also has practical implications for the conduct of litigation and government policy making
