Standardization and Tacit Knowledge Douglas W. Maynard, 2002-01-31 This volume presents a theoretical and empirical inquiry into the interaction between interviewers and respondents in standardized research interviews It concentrates on the interaction and conversational architecture at work in the interviewing process Interaction and the Standardized Survey Interview Hanneke Houtkoop-Steenstra, 2000-08-03 This study investigates in detail the interaction between interviewers and respondents in standardised social survey interviews Applying the techniques of conversation analysis Hanneke Houtkoop Steenstra reveals how certain rules of normal conversation fail to apply in interviews based on a standard questionnaire and offers original empirical evidence to show what really happens Her book demonstrates that interview results can only be understood as products of the contingencies of the interview situation and not as is usually assumed the unmediated expressions of respondents real opinions Her conclusions have important implications for anyone interested in effective survey compilation and interpretation The book is highly accessible setting out the basic tools of conversation analysis simply and clearly and suggesting ways of improving questionnaire design wherever possible Its approach will be of great interest to students and researchers of survey methodology **Envisioning the Survey Interview of the Future** Frederick G. Conrad, Michael F. in order to obtain high quality results with minimal error or bias Envisioning the Survey Interview of the Future addresses questions that researchers in survey methodology and communication technology must consider such as How and when should new communication technology be adopted in the interview process What are the principles that extend beyond particular technologies Why do respondents answer questions from a computer differently than questions from a human interviewer How can systems adapt to respondents thinking and feeling What new ethical concerns about privacy and confidentiality are raised from using new communication technologies With its multidisciplinary approach extensive discussion of existing and future technologies and practical guidelines for adopting new technology Envisioning the Survey Interview of the Future is an essential resource for survey methodologists questionnaire designers and communication technologists in any field that conducts survey research It also serves as an excellent supplement for courses in research methods at the upper undergraduate or graduate level
