that we render unlawful Shedding light on the evolutionary and psychological origins of disgust the authors reveal how ancient human intuitions about what is safe to eat or touch or who would make an advantageous mate have become co opted by moral systems designed to condemn behavior and identify groups of people ripe for marginalization Over time these moral stances have made their way into legal codes and disgust has thereby served as the impetus for laws against behaviors almost universally held to be disgusting corpse desecration bestiality and as the implicit justification for more controversial prohibitions homosexuality use of pornography Written with a critical eye on current events Lieberman and Patrick build a case for a more reasoned approach to lawmaking in a system that often confuses gross with wrong *Assembly West Point Association of Graduates (Organization)*,1989
