## **The Earth Report The Essential Guide To Global Ecological Issues:**

The Earth Report: The Essential Guide to Global Ecological Issues , **The Earth Report** Edward Goldsmith, Nicholas Hildyard, 1988    A Core Bibliography on Global Issues Related to Environment, Resources, Population, and Sustainable Development , 1991    Global Change Information Packet , 1992    Acid Earth John McCormick, 2013-11-05 Acid rain was one of the major environmental issues of the 1980s But while industrialized countries have taken measures to reduce the emissions that lead to acidification the problems have not gone away Trees are still dying lakes are still being made uninhabitable buildings are still corroding and human health is still suffering The most worrying trend is the repetition in the industrializing countries of Asia and Latin America of the problems that have long afflicted Europe and North America More than 10 years after it was first published the highly acclaimed Acid Earth still provides the only global view of acidification and remains the standard text on the subject Chapters on the causes effects and growing scientific understanding of acid pollution and the possible solutions are followed by detailed studies of the political struggles involved in responding to acid damage in western and eastern Europe the US and the newly industrializing countries Written in non technical language for people interested in the problems of the environment Acid Earth calls for a renewed sense of public and political will to bring the problems of acid pollution under control The book also makes valuable reading for specialists and students Originally published in 1992    **Global Climate Change Pathfinder** Chestalene Pintozzi, Douglas E. Jones, 1992    **Earth Follies** Joni Seager, 2019-03-21 First published in 1993 The question of agency is essential to our understanding of environmental problems who is responsible and why Threats such as ozone depletion global warming and overconsumption are all precipitated by the powerful institutions which shape modern life institutions which are overwhelmingly controlled by men and dominated by masculine presumptions Joni Seager argues that the gender bias inherent in western culture is inextricably linked to our environmental crisis She analyses the traditional institutes of power governments the military and transnational corporations and also takes a critical look at the equally patriarchal environmental establishment comparing the work of the official environmental movement grounded in masculine thought with the smaller scale direct actions taken by women driven to protect their homes and communities Earth Follies represents an incisive and utterly convincing feminist critique of our environmental crises and offers radical and productive priorities for the environmental agenda    **Greening the Corporation** Peter Thayer Robbins, 2010-09-23 Corporate responses to environmental challenges are often held directly or indirectly responsible for significant worldwide environmental destruction Corporations are beginning to respond to environmental and social concerns and are taking these into account This process known as the greening of the corporation is fraught with contradictions since the foremost aim of corporations is to earn profits Robbins analyses the approaches of four major international companies ARCO Chemical Ben Shell and The Body Shop    **National Library of Medicine Current Catalog** National Library of Medicine (U.S.), 1991    **The Science of Ocean Pollution** Frank R.
