that nature and society are impossible to distinguish from each other In a world careening towards climate chaos nature is dead It can no longer be separated from society Everything is a blur of hybrids where humans possess no exceptional agency to set them apart from dead matter But is it really so In this blistering polemic and theoretical manifesto Andreas Malm develops a counterargument in a warming world nature comes roaring back and it is more important than ever to distinguish between the natural and the social Only with a unique agency attributed to humans can resistance become conceivable
